

1st PAKISTANI-POLISH INTERNATIONAL SCIENTIFIC CONFERENCE

CONFERENCE BOOKLET

Pakistan-Poland Relations: Challenges and Opportunities in The Changing World

JOINTLY ORGANISED BY

**Department of International
Relations, Federal Urdu
University, Karachi, Pakistan**

**Institute of Political Science,
University of Warmia and
Mazury in Olsztyn, Poland**

1st Pakistani-Polish International Scientific Conference

IBA City Campus Karachi, 6-7 December 2022

Conference Booklet

***“Pakistan-Poland Relations: Challenges and
Opportunities in the Changing World”***

Prepared by

Dr. Faisal Javaid/Dr. Syed Shuja Uddin

Consultation with

Prof. Dr. Arkadiusz Żukowski (In Charge- Scientific Committee)

Dr. Asghar Ali Dashti (In Charge- Organizing Committee)

November 2022

CONTENT

Section One: Detail of the Patronage

1. Prof. Dr. Muhammad Ziauddin Vice Chancellor-Federal Urdu University.
2. Prof. Dr. hab. Jerzy Andrzej Przyborowski, Rector-University of Warmia and Mazury in Olsztyn, Poland.
3. Prof. Dr. S. Akbar Zaidi, Executive Director-Institute of Business Administration, Karachi.
4. Prof. Dr. hab. Paweł Wielgosz, Vice-Rector for International Affairs-University of Warmia and Mazury in Olsztyn, Poland.
5. His Excellency Maciej Pisarski, Ambassador Extraordinary and Plenipotentiary of the Republic of Poland to the Islamic Republic of Pakistan.

Section Two: Detail about the Partner Universities and Departments

1. Introduction about FUUAST
2. Department of IR-FUUAST
 - Faculty Profiles
3. Introduction about the University of Warmia and Mazury in Olsztyn
4. Institute of Political Science, UWM
 - Faculty Profiles

Section Three: Detail about the MoU between the Partner Universities

Detail about the MoU between IR-FUUAST and INP-UWM

Section Four: Detail about the Conference

1. The Purpose and Foundation of the Conference
2. Aims/Objectives of the Conference
3. Theme and Sub-themes of the Conference
4. Important Dates of the Conference

Section Five: Conference Abstracts

Abstracts of the Conference

Section Six: Profiles of the Paper Presenters/Session Chairs/Guests

Profiles of the Session Chairs and Paper Presenters

Section Seven: Detail about the Conference Schedule

Conference Schedule

First Day, Tuesday 6th December 2022

Registration: 8:00-9:30 a.m.

Inaugural Session 9:30-11:00 a.m.

First Session: *Pakistan-Poland Political Relations: Challenges and Opportunities.* 11:15-12:55 p.m.

Second Session: *Pakistan and Poland reflections on the changing world order.* 1:55-3:20 p.m.

Third Session: *Pakistan-Poland Economic Relations: Challenges and Opportunities* 3:20-4:50 p.m.

Second Day, Wednesday 7th December 2022

Fourth Session: *Pakistan-Poland Cultural Relations: Challenges and Opportunities* 9:30-11:00 a.m.

Fifth Session: *Pakistan-Poland Defense and Strategic Relations: Challenges and Opportunities* 11:15 -1:00 p.m.

Sixth Session: *Pakistan and Poland Visions, Strategies, Military and Economic Initiatives towards Contemporary Security Threats* 1:55-3:30 p.m.

Concluding Session 3:30-4:30 p.m.

Section Eight: Detail about the Venue

Detail about the Venue

Section Nine: Detail about the Partners of the Conference

1. Higher Education Commission (HEC), Islamabad.
2. Polish Political Science Association (PPSA)
3. Institute of Business Administration, Karachi
4. Area Study Centre for Europe, University of Karachi
5. Pakistan Journal of International Affairs (PJIA)
6. Department of International Relations, DHA Suffa University Karachi

Section One: Patronage Profiles

1. Prof. Dr. Muhammad Ziauddin, Vice Chancellor-Federal Urdu University.
2. Prof. Dr. hab. Jerzy Andrzej Przyborowski, Rector-University of Warmia and Mazury in Olsztyn, Poland.
3. Prof. Dr. S. Akbar Zaidi, Executive Director-Institute of Business Administration, Karachi.
4. Prof. Dr. hab. Paweł Wielgosz, Vice-Rector for International Affairs-University of Warmia and Mazury in Olsztyn, Poland.
5. His Excellency Maj Pisarski, Ambassador Extraordinary and Plenipotentiary of the Republic of Poland to the Islamic Republic of Pakistan.

1. Prof. Dr. Muhammad Ziauddin

Vice Chancellor-Federal Urdu University.

Dr. Muhammad Zia Uddin was appointed Acting Vice-Chancellor of the Federal Urdu University in October 2022. Dr. Zia Uddin credits the university's faculty, staff, and non-faculty members for his appointment as vice chancellor of Pakistan.

Since he joined FUUAST, he has provided assistance to this most esteemed organization in our nation, whose first university is trying to develop the national language of the nation. In performing his obligations as the Vice Chancellor of FUUAST, he has been actively putting his impressive international experience to use with youthful zeal. He wasted no time in starting a number of reforms to improve the teaching, research, and employment opportunities at this institute in Pakistan as well as to introduce new governance and management practices.

Professor of History at FUUAST in Abdul Haq, Karachi, Dr. Zia Uddin earned his PhD in history from Baluchistan University. He spent the previous twenty years in Baluchistan working with many prestigious programs in Baluchistan's universities before coming back to FUUAST in 2011. He was named the Dean of the Faculty of Arts in 2018 and afterwards the Dean of Education and Islamic Studies of FUUAST.

He has outstanding academic qualifications and a long list of publications in prestigious journals to his name. He is the author of a book.

He received awards at many levels for his teaching and scholarly research, which is the most prominent testament to his leadership in education. He continues to be ahead of his time in his zeal for advancing transdisciplinary learning and educational methods among students, scholars, managers, and leaders around the world.

2. Prof. Dr. hab. Jerzy Andrzej Przyborowski,

Rector-University of Warmia and Mazury in Olsztyn, Poland.

dr hab. Jerzy Przyborowski, professor of UWM, was born in 1964 in Łasin, Kuyavian-Pomeranian Voivodeship. He graduated from ART (College of Agriculture and Technology) in Olsztyn in 1988. He was conferred the title of doctor in 1992 at the Warsaw University of Life Sciences, horticulture - genetics, plant breeding and biotechnology, and the title of doctor habilitated in 2004. He specializes in biotechnology, genetics and plant breeding. His first job was at the Agricultural Advisory Unit at the Institute of Agricultural Education of ART in Olsztyn, which he took up shortly before graduation. After working for several months at the unit, in February 1989 he started work as an assistant trainee at the Unit of Genetics and Seed Production of the Department of Plant Breeding and Seed Production and began his doctoral studies in biotechnology at the Department of Genetics, Plant Breeding and Biotechnology at the Warsaw University of Life Sciences.

In 1992, he was employed at the Department of Plant Breeding and Seed Production of the Faculty of Environmental Management and Agriculture of the UWM, initially as an assistant lecturer and, subsequently, as a lecturer. In 2014, he assumed the position of Vice-Rector for Education Development and Student Affairs – 1st deputy of the Rector. He is Head of the Inter-Departmental Plant Biotechnology Workshop at the Faculty of Environmental Management and Agriculture.

He conducts research in crop biotechnology (molecular genetics and plant in vitro cultures) and plant breeding. He is the author of 51 publications, including 46 original research papers, 1 monograph and 2 lecture scripts. He is a co-author of 1 book and 2 lecture scripts. Professor Przyborowski is a co-author of 11 utility models – cultivars of *Salix* spp. and 1 nucleotide sequence in the NCBI GenBank. Citation index

311. Hirsch index 9. Professor Przyborowski has supervised several dozen master and engineer diploma theses. He is a member of several scientific unions and associations.

Awards and distinctions: Bronze Cross of Merit, “Zielony Feniks” Statuette – Team Award of Zielony Feniks Foundation for scientific and research achievements in sustainable energy engineering, eight awards granted by the Rector of UWM, 2018 – Medal of the Commission of National Education, 2019 – The “Best of the Best” Laurel awarded by Marshal of the Warmińsko-Mazurskie Voivodship.

3. Prof. Dr. S. Akbar Zaidi

Executive Director-Institute of Business Administration, Karachi.

Professor Dr. S. Akbar Zaidi is the Executive Director of the IBA. He is a renowned political economist with an experience of four decades of teaching and research in Pakistan and abroad. His areas of interest in research include political economy, development, the social sciences, and history. He completed his PhD in History from the University of Cambridge in 2009. Prior to his appointment as the Executive Director, IBA Karachi in 2020, Dr. Zaidi served as Professor at Columbia University, New York and held a joint position at the School of International and Public Affairs (SIPA), and at the Department of Middle Eastern, South Asian, and African Studies (MESAAS), from 2010 to 2020, when he became the Executive Director of the IBA. Dr. Zaidi has written numerous books, and over 80 academic articles in international journals and as chapters in books.

4. Prof. Dr. hab. Pawel Wielgosz

**Vice-Rector for International Affairs- University of Warmia and Mazury
in Olsztyn, Poland.**

Paweł Aleksander Wielgosz graduated from (1997) the Faculty of Geodesy and Spatial Management of the Academy of Agriculture and Technology in Olsztyn (currently the University of Warmia and Mazury); doctor of technical sciences in the discipline of geodesy and cartography (2002); doctor habilitated (2011); professor (2019).

His research interests include precise point positioning with the use of GNSS techniques and the application of satellite techniques to monitor the state of the earth's ionosphere and troposphere.

He is the author or co-author, among others, of more than 60 original scientific papers published in peer-reviewed journals and three patents. He has managed seven research projects, including international projects financed by the ESA. Additionally, he participated in several scientific projects in Poland and abroad as a researcher. He is an expert for H2020, the National Science Centre, the Polish National Agency for Academic Exchange, the Foundation for Polish Science and the National Centre for Research and Development competitions.

In 2002-2005 he completed a research stay in the Ohio State University, USA, during which (in 2004) he won the prestigious Heiskanen Senior Award. In recent years, he has completed short-term research stays abroad, among others, at the ESA, the Universitat Politècnica de Catalunya in Barcelona, Spain, Wuhan University in China and GeoForschungs Zentrum in Potsdam, Germany.

Since 2017, he held the function of the Dean of the Faculty of Geodesy, Geospatial and Civil Engineering UWM in Olsztyn (the Faculty of Geoengineering since 1 January 2020), previously (in 2012- 2017) he was the Vice-Dean for Science. From 2015 to 2017 he was the Director of the Institute of Geodesy.

He is a member of scientific councils of the Institute of Geodesy and Cartography (since 2017) and the Space Research Centre of the Polish Academy of Sciences (since 2019). Since 2019, he has been a member of the State Geodetic and Cartographic Council. Prof. Paweł Wielgosz is an active member of national and international scientific organisations, namely the International Association of Geodesy – IAG, European Geosciences Union – EGU, International GNSS Service – IGS. In the IAG he holds the function of the Chair of Sub-Commission 4.4: “GNSS Integrity and Quality Control”, and since 2007 he has been a member of the Management Board of Commission 4 “Positioning and Applications”. Since 2015, he has been a member of the Global Geodetic Observing System (GGOS) Science Panel. He is deputy editor-in-chief of “Journal of Geodesy” and a member of publishing boards of: “Journal of Satellite Navigation”, “Artificial Satellites”, “Reports on Geodesy and Geoinformatics”, “Journal of Geodetic Science”, as well as “Geodesy and Cartography”. He is a member of the Committee on Geodesy of the Polish Academy of Sciences (a vice-president in the 2016-2019 term). In 2019 he was appointed the President of the Satellite Geodesy Section of the Space and Satellite Research Committee PAN, and the member of National Committees for the International Union of Radio Science (URSI) and for Cooperation with the International Union of Geodesy and Geophysics (IUGG) PAN. Since 1 January 2020, he has been a member of the GNSS Science Advisory Committee (GSAC) at the ESA.

5. His Excellency Maciej Pisarski,

**Ambassador Extraordinary and Plenipotentiary of the Republic of Poland to the
Islamic Republic of Pakistan**

Maciej Pisarski has served as Ambassador of Poland to the Islamic Republic of Pakistan since October 14, 2021.

Prior to his current position he served as director of the Department of Foreign Policy Strategy at the Polish Ministry of Foreign Affairs between February 2018 and August 2021. He also served as deputy chief of mission of the Embassy of Poland in Washington, DC (2010-2017). His professional career includes experience in developing Polish-American relations and advancing Transatlantic cooperation while holding a position of deputy director of the Department of the Americas, US Desk Officer at the Polish MFA and member of the Political Section in the Polish Embassy in Washington, DC. Between 2008-2010 he served as acting director of the Department of Strategy and Planning.

Between 2017-2018, Mr. Pisarski served as Special Envoy for Dialog with Jewish Diaspora at the MFA and head of the Polish Delegation to the International Holocaust Remembrance Alliance. Mr. Pisarski has written on the Polish-American and Polish-Jewish relations.

He graduated from the Department of History at the Warsaw University and the National School of Public Administration.

Introduction about FUUAST

The Federal Urdu University of Arts, Sciences & Technology enjoys the unique distinction of being the first ever university in Pakistan, which ultimately aims at using Urdu as the main language of instruction and teaching. The University was established on 13th November 2002 under Ordinance No. CXIX of 2002 promulgated by the President of Pakistan. As per provision of this ordinance the university has its principal seat at Islamabad. The university started functioning in November 2002 by taking over two federal government colleges namely Federal Urdu Science College, Karachi which were established in 1949 by Baba-e-Urdu Dr. Abdul Haq. Whose mission was only to promote Urdu as teaching and also for Urdu language as national language. He remains struggling till his last moment of life.

Federal Urdu University of Arts, Science & Technology has two campuses in Karachi, and one campus in Islamabad. There are more than 12,000 students in Islamabad and Karachi campuses and 450 faculty members in Islamabad and Karachi campuses.

This university consists of three campuses:

Abdul Haq Campus

Gulshan Campus

Islamabad Campus

President of Pakistan is the first Chancellor and Dr. Prof. Peerzada Qasim was the first Vice Chancellor of this University. Due to its Federal existence, the University is centered at Islamabad, and it can establish campuses in any province of Pakistan.

The progress and expansion of the university over the short period of the time since its inception, is remarkable, presently the University offers 39 undergraduate and 31 Master programs beside M. Phil and Ph.D. programs under its full-fledged faculties including those of Arts, Theology, Education, Science & Technology along with engineering, Business Management, Commerce & Economics, Pharmacy and Law.

To impart education in Urdu Language as a medium is the basic objective of this University and equipping students with English Language to compete with

international expertise. One of its basic objectives is to make available the modern and advanced education in Arts, Science and Technology, particularly Information Technology, to the people who cannot afford.

Every university has a culture that develops with time as the institution ages and matures. In all diversity, however, there is one common ground, to aim for academic excellence. With this as a driving force, and with the availability of resources, any institution can achieve the goal of providing the best education, and producing the best engineers, scientists, artists, scholars and above all citizens.

Federal Urdu University of Arts, Science & Technology is highly regarded for its strong academic departments, including Economics, Computer Science, Business Administration, Urdu. With the rapidly transforming innovative approach to teaching, research and learning, we are slowly but surely establishing a good reputation among employers, FUUAST stands amongst the top 10 leading research universities, in selected areas.

Department of IR-FUUAST

The Department of International Relations is proud of its distinguished academic reputation and the BS and MA, M.Phil. and PhD degrees it offered in the field. The department's mission is to educate students in a way that helps them understand global concerns better. It is a fascinating and significant subject that emphasizes economics, culture, education, and political science heavily while also looking at how these factors affect society. The FUUAST, Department of International Relations, is crucial to helping students launch successful careers, which has achieved success in a wide range of industries and institutions, including international organizations and global trade. Many of them now hold lucrative positions in various government agencies. Future success can be greatly facilitated by the knowledge and abilities developed in an IR major.

Department of International Relations cherishes a unique place of academic excellence. The Department's goal is to enlighten the students in such a great way to gain a deeper understanding of global issues. It is an intriguing and important subject which places great emphasis on economics, culture, education, and political science and examines its impact on society. The Department of International Relations, FUUAST plays a key role in the making students' professional careers. Which can be seen successful in many different professions and organizations including International organizations and international business. Many of them have got lucrative jobs in different Government Departments. The intellectual skills acquired in a IR as a major are a great foundation for future success.

Graduate students have access to a wide variety of knowledge and activities in the areas of international studies, political theory, and government and politics. Students receive training in the highest standards of critical analysis, as well as in the comprehension and application of rigorous research methodologies and techniques, and teaching is based on the most rigorous contemporary scholarship.

The four-year, full-time BS in International Relations program trains students for employment in academia, government, non-governmental organizations (NGOs), journalism, think tanks, or private industry. The course offers students an interdisciplinary investigation into the subject of what exactly constitutes the world

political system. Our program also offers a "close focus" of each component of the international order, which merits its own unique attention because the global political order is composed of a variety of historically molded, socially diverse, and unevenly developed entities and activities. A faculty with a variety of educational experiences and a multicultural student body drawn from around the nation, representing all regions of the country, promote both dispositions.

In the final year of the BS program, elective courses are divided into the following categories: Strategic Studies, USA, Russia, Central Asia, Far East Asia, South Asia and Middle East. This division reflects the program's commitment to interdisciplinary learning. In order to specialize in a field that is closely relevant to their final projects or theses, students are required to take courses from all subdivided courses.

The program focal ethos is represented in how our faculty members deliver their lectures: through seminar discussions in classes where students can put their skills to use on a range of written and spoken tasks. Every student can be heard and given the opportunity to express themselves as best abilities to the students' flexible attitude to assignments and extremely diversified academic atmosphere. Regular instructor input promotes group learning and self-reflection. This aids students in crafting better thesis and final project questions as well as in selecting a suitable supervisor.

The academic staff of the department engages in research in fields with a global geographic scope, sources from both the past and the present, and historical and contemporary sources, pragmatic, and philosophical issues.

The department's postgraduate offerings include five-year doctorate research degrees as well as taught Master of Studies or Philosophy degrees. However, research is a component of all taught degrees, and all research degrees include some taught elements, such as quantitative and qualitative research methods.

Faculty Profiles

1. Prof. Dr. Sayida Daud

Prof. Dr. Sayida Daud was the Chairperson and founder of the department of International Relations. She served here for three decades. The post graduate program was also launched with her efforts. Her area of interest is European History and Middle East. She knows English, French and German languages. Presently she is working as dean at Metropolitan University while previously she held the same positions in several private renowned Universities. She has 20 research papers.

2. Prof. Dr. Syed Wasimuddin

Prof. Dr. Syed Wasimuddin has worked as a Chairman, Department of International Relations at FUUAST for three terms (2006 – 2009, 2012-2015, 2015-2018). He is research supervisor at Area Study Center for Middle East and Arab Countries, University of Baluchistan, Quetta. He is also a gold medalist in securing first class first position in Masters in International Relations, Federal Urdu University of Arts, Science and Technology. His area of interest is the study of Political and Social Movements around the world. He is also author of a book titled Dictionary of International Relations published by Federal Urdu University. There are a number of international and national research papers on his credit. He has also attended international conference as a presenter.

4. Dr Mamnoon Ahmad Khan

Dr. Mamnoon Ahmad Khan, Assistant Professor Department of International Relations Federal Urdu University Karachi. Formerly, He was the Chairman of Department of International Relations, In Charge M.Phil./ PhD. Program and member Syndicate.

Dr. Mamnoon did his Masters in International Relations from University of Karachi. In 2004, He was selected by the Board of Advance Studies and Research University of Karachi as a Research Scholar in the Department of International Relations for PhD Program. His dissertation topic was Kashmir Dispute: A Search for Solutions (1947-2003) under the supervision of renowned scholar Prof. Dr. Talat A. Wizarat. His dissertation has been approved from University of British Columbia, Canada and Rutgers University, USA for the award of PhD degree. He has presented a proposed solution of Kashmir Dispute by the name of Slow but Steady Process, which has proved to be a justifiable, honourable, equitable and practicable solution of this decades old conflict between Pakistan and India.

He was chosen by HEC as Assistant Professor in IPFP Program. After a year, he was appointed as Assistant Professor in the Department of International Relations.

Dr. Mamnoon teaches Arms Control and Disarmament and Security Studies in BS, MA, M.Phil. and PhD Programs. He is the author of two books on Kashmir Dispute. His research papers have been published in many journals of international repute. He has produced three PhDs., several M.Phil. and PhD students are pursuing their degrees under his supervision. He has been to many countries of Europe and can speak German.

5. Dr. Faisal Javaid

Dr. Javaid is an assistant professor at the Department of International Relations and serving as an academic since 2009. He has a PhD. in International Relations and Post-Doctorate from Harriman Institute, Columbia University, New York, USA. His primary area of Interest includes Central Asia Region and its foreign relations with regional and global powers; Connectivity between South Asian and Central Asian; Sino-Russian relations in Central Asia as well as foreign policy of Pakistan. He edited two books “Istalahat-e Benalaqwami Taluqaat” and “Connectivity through One Belt One Road between Central Asia and South Asia”. His more than 27 research papers have been published in international and national research journals. Dr. Javaid organized two international conferences and successfully got the grant from Higher Education Commission, Islamabad. He presented his research work in two global conferences (Moscow and Chicago). Currently, he is a member of four major Political Science Associations that are International Political Sciences Association (IPSA), Midwest Political Science Association (MPSA), American Political Theory (APT) and International Studies Association (ISA). Dr. Javaid is a HEC approved PhD supervisor. He supervised two PhD, eight M.Phil., and one M.Phil. as a co-supervisor. He is working as a Guest Researcher in the project titled “TRANSECT” at Eberswalde University for Sustainable Development, Germany. He is also serving as a Non-Resident Fellow at Institute of Policy Studies (IPS), Islamabad.

6. Dr. Rizwana Jabeen

Dr. Rizwana Jabeen is an Assistant Professor of International Relations at Department of International Relations, Federal Urdu University, Abdul Haq Campus, Karachi. She holds PhD in IR with a special focus on atomic proliferation in South Asia and its effects and consequences. Her area of research expands to conflict resolution, conflict management and confidence building measures with special reference to South Asia.

She has authored 8 research articles of diverse areas including atomic proliferation, globalization, foreign policy, Middle East and South Asia. She has also authored a book “Middle East “for the students of IR, political science and history.

Dr. Jabeen is actively involved in different administrative and management assignments of Federal Urdu University where she is serving as member / head of various committees related to university discipline, examination center supervision, board of studies and department library supervision. She is member of board of studies, as well as Faculty Selection Board of IR Program of DHA Suffa University. Dr. Rizwana Jabeen is a well-liked teacher and student advisor who takes great pride in supporting and supervising her students in best possible ways.

She has 15 years of diverse experience of working in teaching, research and broadcasting. She often appears on TV and give opinions to the locally acclaimed newspapers on topics related to IR, current affairs, politics, society and foreign policy of Pakistan. Her notable contributions to the field of academia and media inspires others, specially to the young female academicians who are willing to build positive repute of a dignified professional, prolific researcher, and empathetic human being.

7. Dr. Syed Shahab-u-din

Dr. Syed Shahab-u-din is serving as an Assistant Professor since 2012 at the Department of International Relations, Federal Urdu University of Arts, Science and Technology, Karachi. He completed his Ph.D. in 2013. He is the first Ph.D. of Department of International Relations. His area of interest is Political economy. He is the editor of one of the well-recognized international journals related to the world politics. His more than 50 research papers have been published in the national and international research journals and he is the author of 3 books. He is the active member of various International Research Societies.

8. Dr. Muhammad Arif Khan

Dr. Muhammad Arif Khan is an Assistant Professor at the Department of International Relations since 2015. He did Ph.D. in International Relations from SIPA, Jilin University. Dr. Khan is a HEC approved Ph.D. Supervisor. He has published research articles in both national and international research journals. His main area of interest includes South Asia, BRI and CPEC, Peace and Conflict Studies, Power Transition and International System, Regional Cooperation and Integration, Strategic Stability in South Asia and Non-Traditional Security Threats. He can be reached at arif.khan@fuuast.edu.pk.

9. Dr. Syed Shuja Uddin

Dr. Syed Shuja Uddin is an Assistant Professor at the Federal Urdu University's Department of International Relations in Karachi, Pakistan. His doctorate in International Relations was earned at the University of Karachi. He specializes on the relationship between Pakistan and India, Afghan affairs, Pakistani foreign policy, and security issues. His primary areas of expertise are Defensive Realism and Offensive Realism. More than eight research articles were also published in local, national, and worldwide journals.

He has good academic writing and speaking abilities and is a good researcher. His capacity to comprehend issues, arrange ideas, discover crucial information or facts, and offer a well-rounded academic argument is really excellent. He is a very accomplished academic with a keen interest in research. He excels at using his own knowledge and observations to form well-considered judgments on a range of subjects. It is quite commendable that he is currently focusing on modern issues, especially International System: Cooperation or Conflict, Climate Change: Postponement or Anticipation, Migrants: Public Health and National Health, International Relations Theory and the Problem of Sustainable Development.

10. Dr. Shahnawaz Muhammad Khan

Dr. Shahnawaz Muhammad Khan is working as an Assistant Professor at Department of International Relations, Federal Urdu University Karachi. He is teaching since 2010 and before this position, he was research fellow at Pakistan Institute of International Affairs. He completed his Ph.D. in International Relations in 2019 and his thesis was titled “Chinese Political and Economic Interests in Central Asia: A Study (2001 to 2015)”. Dr. Shahnawaz did his Masters in International Relation from University of Karachi. His area of interest is Central Asia, Political Geography and Conflict Resolution. He has more than 20 research paper published in national and international research journal. He attended several national and international conferences.

11. Dr. Afshan Iqbal Brohi

She has been serving the Department of International Relations, Federal Urdu University, Karachi since 2014. Holds a Ph.D. degree from the same university on the topic of "Pak-India Military Relations". Dr. Afshan is very dynamic person and also working in different committees of the Department. She is also a gold medalist in securing first class first position in Masters in International Relations, Federal Urdu University of Arts, Science and Technology. She has a degree of Master degree in Political Science and she is also a Law graduate. Her area of interest is the study of diplomatic history of superpowers, global and regional political issues in contemporary world and competitive politics. There are a number of international and national research papers on her credit.

Introduction about the UWM

The University of Warmia and Mazury in Olsztyn (UWM) was founded on 1 September 1999. The establishment resulted from merging three institutions of higher education in Olsztyn, i.e. the Academy of Agriculture and Technology, the Higher School of Pedagogy, and Warmian Theological Institute.

At first, in 1999, there were 12 faculties, 32 branches of study, and 24.500 students at UWM. The University also had a right to grant doctoral degrees in 13 scientific disciplines, and postdoctoral degrees in 6 branches. According to the University's Act of Establishment, the position of the first Rector of UWM was taken by, dr hab Ryszard Górecki. The University has been settled in Kortowo – an academic campus that used to belong to the Academy of A&T.

UWM has been developing intensively almost from the day it was founded. Its teaching and research base has increased significantly. The University purchased modern equipment for laboratories and classrooms. UWM used significant resources from EU funds for this purpose. New departments were established, new fields of study appeared.

Currently, the structure of the University consists of 15 faculties, the School of Public Health and the UWM' branch in city - Elk

In the 2020/21 academic year, approx. 18 thousand student study, including approx. 17 thousand in full-time studies and 600 doctoral students and approx. 1 thousand. people in postgraduate studies.

The University is authorized to confer doctoral degrees in 21 scientific disciplines and postdoctoral degrees in 16 disciplines.

Institute of Political Science, UWM

The Institute of Political Science (IPS) was created as a result of the division of the Institute of Political, Philosophical and Social Sciences into two separate units. It was founded in the ruling by the Rector of the University dated 10th April 2001. The Institute operates within the Faculty of Social Sciences (until 2004 the Institute was a part of the Faculty of Humanities).

The Institute belongs to the youngest, according to the age (the average full professor is 56,0 years old, assistant professor 52,5 years old, doctors 35,4 years old) and to the most developing, according to the scientific achievements (acquiring scientific degrees and numbers of publications) organisational units of the University. The latest success of the Institute on scientific field is a right to grant a doctor's degree in political science (decision of the Central State Commission to the Scientific Degrees and Titles from 30th March 2009).

The vital aim of the activity of the Institute is research field. The staff conducts permanently individual and team research cooperating in this case with Polish and foreign scientific institutions. The staff take actively part in scientific events in Poland as well as in abroad (congresses, conferences, symposiums, research teams, membership in scientific associations). The Institute is a member of The International Political Science Association (IPSA). Prof. zw. dr. hab. A. Żukowski from 2016 - as a representative of PTNP - sits on the presidium of the European Confederation of Political Science Associations (ECPSA). INP representatives perform functions in the scientific committees of the Polish Academy Science. Prof. dr hab. Arkadiusz Żukowski was a member of the Presidium in 2011-2014 Committee of Political Sciences of the Polish Academy of Sciences, and in 2015-2018 - the vice-chairman of this Committee. In turn, dr hab. Selim Chazbijewicz, prof. UWM was elected three times for Committee of Oriental Sciences of the Polish Academy of Sciences (2007-2018). In January 2001, the Institute employees founded the Branch of the Polish Society of Political Science (PSPS) in Olsztyn which is associated with the International Association of Political Science.

Since the year 2000 the Institute has investigated the research problem The Socio-Political Dilemmas of Our Age and the Relevant Research Methodology. The

programme gave an opportunity to utilize the interdisciplinary character of the Institute, taking into consideration several problems related to political science, the modern history of Poland, axiology, methodology, logic, sociology, social philosophy, religion, anthropology, ecology. Nowadays within the framework of the Institute three research grants are carried into execution: Dilemmas of functioning of contemporary democracies – consolidation or crisis? Methodology and theory of politics – application to the socio-political reality, Social and Political Issues and Developmental Megatrends in the Modern World. Areas of the academic interest of the team members are first of all: the worldwide developmental megatrends: globalization, regionalism and localism; functioning of modern democracy (party system, electoral system, self-government, etc.); security policy; civilization threats; problems of ethnic and denominational policy; impact of religion to politics and ideology; the problem of unemployment in the social, political and ethical context; human rights issues; traditions of the Polish political thought and the present day; methodology of social sciences; philosophical, cultural and political anthropology issues; various areas of culture: morality, art and religion.

INP employees actively participate in international cooperation based on international agreements and individual non-institutionalized contacts. They are using the knowledge gained in process of scientific development, strive to popularize it in the media. The main form dissemination of knowledge are interviews given by employees, broadcast in the Polish Television Branch in Olsztyn and local radio stations (including university radio station). So far, the subject of interviews has focused, among others on major political events, as well as international relations.

The Institute of Political Sciences of the UWM organizes the regional qualifying rounds of the "Olympics about Poland and the Modern World "(since 2008) and "Olympics of Security and Defense"(from 2016).

Institute of Political Science consist with two departments: Department of Political Sciences and Security Sciences and Department of Sociology.

Institute of Political Science educate in four fields of study: political science, national security, sociology and analytic and public management.

Faculty Profiles

Prof. zw. Dr. hab. Arkadiusz Żukowski

Chairman of Institute of Political Science

Arkadiusz Żukowski received his Ph.D. in sociology from Jagiellonian University in Cracow in 1992, and he also earned a postdoctoral degree (Habilitation) in political science from the University of Warsaw in 2000. The Model of a Well – Conducted Local Project), in co-authorship with Ph.D. Elżbieta Subocz, „*Warmińsko-Mazurski Kwartalnik Naukowy. Nauki Społeczne*”, no 2 (18)/2016; Rural Poland at the Beginning of the 21st Century, „*Eastern European Countryside*”, no 21/2015; *Korzyści i koszty funkcjonowania umowy o małym ruchu granicznym z Rosją w opiniach mieszkańców terenu przygranicznego* (Benefits and Costs Functioning of the Agreement on Border Traffic with Russia in the Opinions of the Inhabitants of Borderland Area), in co-authorship with Ph.D. Elżbieta Subocz, „*Opuscula Sociologica*” no 2/2015; Regional Aspects of Social and Economic Restructuring in Eastern Europe, „*Eastern European Countryside*” no 19/2013; *Zróżnicowanie postaw osób nieaktywnych zawodowo po 45. roku życia w świetle wyników badania jakościowego* (Differentiation of Attitudes of

Economically Inactive People Over 45 in the Light of the Results of the Qualitative Survey), „Polityka Społeczna”, no 11-12/2012.

7. Dr. Michał Łyszczaż

Michał Łyszczaż, (Ph.D.), an Associate Professor and political scientist at the Department of Sociology, Institute of Political Science, Faculty of Social Science, University of Warmia and Mazury in Olsztyn.

Dr. Michał Łyszczaż is a member of the Polish Sociological Association, Polish Oriental Society and Common Council of Catholics and Muslims. He is interested in the sociology of ethnic minorities, in particular the Polish Tatars community. His research focuses on sociology of culture and religion, especially process of conversion to Islam and religious dialog between Christianity and Islam. M. Łyszczaż is also engaged in research regarding assimilation and integration problems of Muslim communities in Poland and specificity of multicultural borderline area.

His work has appeared in two books: M. Łyszczaż, *Młode pokolenie polskich Tatarów. Studium przemian generacyjnych młodzieży w kontekście religijności muzułmańskiej oraz tożsamości etnicznej* [The young generation of Polish Tatars. A study of youth generational changes in the context of Muslim religiosity and ethnic identity], Olsztyn-Białystok 2013, pp. 317, ISBN 978-83-64358-21-0; M. Łyszczaż, *Siufkacze i fałdżeje. Tatarska magia ludowa* [Siufkaczs & faldzejs. Tatar folk magic], Białystok 2021, pp. 132, ISBN 978-83-65802-40-8) and over fifty articles in scientific journals, popular magazines and chapters in collective monographs.

8. Dr. Stefan Michał Marcinkiewicz

Dr. Stefan Michał Marcinkiewicz (Ph.D.), sociologist, at the Institute of Political Science, Faculty of Social Science, University of Warmia and Mazury in Olsztyn. His specialization in new media, migration, memory studies and local history. His current research topics include history and collective memory in shaping local identity in the south-eastern Masuria. 2011 obtained a PhD in sociology at Faculty of Sociology and History at the University of Białystok.

Since 2012 became an adjunct lecturer at the Departament of Sociology, Faculty of Social Sciences at the University of Warmia and Mazury. He cooperates with the Historical Museum in Ełk. The author eg.: *Narodowa rewolucja. O nazizmie i wojnie na podstawie materiałów z powiatu ełckiego* (National revolution. On Nazism and the War on the basis of materials from the Ełk district, 2021), ‘Widmo śmierci’ (31 X 1943). *Partyzancka legenda, polityka i pamięć w powiecie ełckim* "The Specter of Death" (October 31, 1943). A guerrilla legend, politics and memory in the Ełk county, (2020).

9. Dr. Elzbieta Subocz

Dr. Elzbieta Subocz (Ph.D.), a sociologist, an Assistant Professor at the Institute of Political Science, Faculty of Social Science, University of Warmia and Mazury in Olsztyn. Her Ph.D. dissertation concerned educational opportunities for children living in families with different socio-economic status. Her scientific achievements are in the field of social sciences, in the disciplines of sociological sciences and pedagogy. The main area of professional interest is the sociology of family and childhood, sociology of social problems (with particular emphasis on the issues of social exclusion and poverty) and the sociology of local communities. Most recent publications are: *The impact of the COVID-19 pandemic on the situation of young people in the European labour market – selected aspects*, “Edukacja Ustawiczna Dorosłych. Polish Journal of Continuing Education” 2022, No. 2; *Care farms as an innovative form of support and social integration of people with special needs*, “Praca Socjalna” 2022, No. 1; *The impact of the COVID-19 pandemic on selected aspects of the functioning of children and adolescents (in the perspective of Polish and international empirical research)*,

Section Three: Detail about the MoU between Partner Universities

Detail about the MoU between IR-FUUAST and INP-UWM

The Federal Urdu University of Arts, Sciences, and Technology (FUUAST), Karachi (Pakistan) and The University of Warmia and Mazury (UWM), Olsztyn, Poland signed a Memorandum of Understanding (MoU) to encourage research and academic interactions between the two universities.

Prof. Dr. Rubina Mushtaq, the acting vice chancellor of the Federal Urdu University of Arts, Sciences, and Technology and prof. dr. hab. Jerzy A. Przyborowski, Rector of the University of Warmia and Mazury (UWM), Olsztyn, Poland and signed the agreement.

This agreement's goals are to establish and carry out collaborative academic activities, as well as to provide a forum for fostering international and intercultural understanding and interactions between the two universities.

Section Four: Detail about the Conference

1. The Purpose and Foundation of The Conference
2. Aims/Objectives of the Conference
3. Theme and Sub-themes of the Conference
4. Important Dates of the Conference

1. The Purpose and Foundation of The Conference

Pakistan and Poland have a long historical relationship. Despite the geographical distance between two countries, the first travelers from Poland began to reach the lands that belonged to Pakistan today, in the Middle Ages. Later, in the 19th century two Polish researchers – Jan Gołaszewski and Bronisław Grąbczewski – prepared the first topographic descriptions of Hunza and Karakoram. The diplomatic relations between both countries were formally established in 1962, with Pakistan being one of the first Muslim state to establish relations with Poland. Historically, people of the two countries have ties going even back to 1940s, when during the Second World War, the city of Karachi hosted about 30,000 Polish refugees, who were evacuated from former USSR by the general Anders Army. Polish pilots, aviation engineers, technicians stayed in Pakistan after the World War II and were awarded honorary citizenship in 1956.

Department of International Relations, Federal Urdu University for Arts Sciences & Technology and Institute of Political Science (FUUAST), University of Warmia and Mazury in Olsztyn (Poland) are going to organize 1st Pakistani-Polish International scientific conference on 6-7 December 2022. This will be the first conference being organized with Polish University under the MOU signed between FUUAST and University of Warmia and Mazury in Olsztyn (Poland).

This conference is unique in many regards. Poland is the largest country in the central Europe and one of the fastest growing economies. Unfortunately, Pakistan and Poland have not been able to establish strong bilateral relations due to some very unfortunate events in 1970. Since then, no serious efforts have been made to repair the ties between the two countries. Pakistan Polish International conference will help heal the past wounds and initiate a new era of relations. Economically, it will open more avenues for economic cooperation between the two states.

2. Aims/Objectives of The Conference

- The aim of the conference is to provide an opportunity for academicians, professionals, and students to have an intensified exchange and discussion of their innovative ideas on the emerging fields between both states.
- Moreover, the conference will be the possibility to present the results of research by Pakistani and Polish scientist and researchers.
- Besides, the important objective of the conference is to promote collaborative excellence among academicians, policymakers and professionals in Pakistan and Poland to explore the opportunities and face the existing challenges.
- This research-based conference gives extensive opportunities for participants to present their valuable findings in front of a truly national audience while getting networking with each other.
- This international conference will provide an opportunity to reflect on what has been happening, to share experiences, perspectives, and responses to those challenges, and at the same time to give thought to setting the directions for the future.
- The objective of this conference is to bring together state researchers, intellectuals, and policymakers working in different fields, exchange information, and bring new contributions to enhance bilateral relations.
- The international conference is significant in that it is the first attempt to bring together the experience and expertise of both academia.
- This conference will be reinforcing business, scientific and technological collaboration between Pakistan and Poland. Moreover, the Conference will not only provide a platform for sharing experience and knowledge but also extend the elements of cultural understanding between the two countries.
- This international platform will help establish thematic networks, especially between both Universities’ faculty and students for constant exchange of ideas, exchange of expertise, experiences, and know-how in their relevant domains.

3. Theme and Sub-themes of The Conference

We accepted abstract of research papers from all over the world on “*Pakistan-Poland Relations: Challenges and Opportunities in the Changing World*” that encompass theoretical approach, conceptual analysis, performance evaluation are invited for presentation on following sub-themes:"

- Pakistan-Poland Political Relations: Challenges and Opportunities.
- Pakistan-Poland Economic Relations: Challenges and Opportunities.
- Pakistan-Poland Defense and Strategic Relations: Challenges and Opportunities.
- Pakistan-Poland Cultural Relations: Challenges and Opportunities.
- Public Diplomacy between Pakistan-Poland: Challenges and Opportunities.
- Pakistan and Poland Relations with neighbor, region and global states.
- Pakistan and Poland reflections on the global powers’ political, military and economic initiatives.
- Pakistan and Poland visions, ideas, strategies towards contemporary security threats.
- Pakistan and Poland reflections on the changing world order.

4. Important Dates of the Conference

Call for Paper Opens	16 August 2022
Proposal Submission Deadline	30 September 2022
Proposal Acceptance/Rejection Notifications	5 October 2022
Registration Opens	6 October 2022
Final Registration Deadline for Paper Presenters	25 October 2022
Paper Submission Deadline	20 November 2022
Registration Deadline for Participants	25 November 2022
PPT Submission Deadlines for Paper Presenters	30 November 2022
Conference Dates	6-7 December 2022

Section Five: Conference Abstracts

Abstracts of the Conference

Abstracts of the Conference

1. Poland and Pakistan as Hubs of the Belt and Road Initiative

Orazio Maria Gnerre,
University of Perugia, Italy.

Abstract

Poland and Pakistan are linked on various levels, from commercial to diplomatic. However, a factor that is little considered in the analysis of the relations between these two countries is the role that the aforementioned countries cover within the project promoted by the People's Republic of China – the Belt and Road Initiative. Obviously the two countries play a different role in very distant sectors, nevertheless they can be considered key players at a macro-continental level due to the geographical and political position they play in their region. These factors of influence and prestige could raise with the increase in international relations of a commercial and human nature that would occur following the construction of a large Eurasian infrastructural network. The speech intends to investigate this perspective, asking another question, the answer of which must be investigated in the context of the hypothetical future: is it possible that the Belt and Road Initiative also increases the existing relationships between these two countries? And – would trade between Poland and Pakistan be distorted to the advantage of other neighboring countries or would it increase in volume?

2. The Polish Officers of the (Royal) Pakistan Air Force

Aleksander Głogowski,
Jagiellonian University, Poland.

Abstract

In 2011, when I presented the first edition of the book “Polskie Orły nad Himalajami” [“The Polish Eagles above the Himalaya”] to the readers, I was contacted by the representatives of the families of the protagonists of the book as well as by a number of people from Pakistan. They asked me whether or not the book was available in an English version. I had the intention of having the book translated for a long time until such a possibility arose. Therefore, I present to the reader the second, extended version of the publication about the history of Polish airmen who helped to form the Royal Pakistan Air force. On the one hand, the history of the Polish officers and aviation technicians after the end of the Second World War is a relatively typical example of the history of people who could not or who did not want to return to their Fatherland due to political reasons. On the other hand, this history is unique, for only a few of the hundreds of thousands of Polish military men who decided to stay abroad managed to continue to exercise their military profession. Many others, including the notable ones such as the commander of the 1st Armoured Division, General Stanisław Maczek, were forced to perform manual labour until the end of their lives. Many of those who returned to the country which was ruled by communists were locked up in prisons or even placed on death row on suspicion of treason and espionage. This was so because the authorities that were installed in Warsaw perceived everyone who served in the Allied forces in the West as a potential threat in the case of a possible armed conflict. There were also concerns about the influence that the war heroes could exert upon the young generation of Poles who challenged the authorities which were imposed by the Yalta Conference. The defeat in the Defensive War in September 1939 did not mark the end of the struggle of the Polish people for independence. First in France and then in Great Britain the Polish Armed Forces were re-established. The latter actively participated in the war effort of the Allies. The Polish Air Force was an important component. At the height of their glory, they consisted of fifteen squadrons: eight fighter squadrons, four bomber squadrons, one fighter-reconnaissance squadron, one artillery aircraft squadron and one cooperation squadron. There were also training centres. Polish airmen also served in British squadrons. Of all the squadrons the No. 303 Fighter Squadron distinguished itself with the highest number of German planes that were shot down. Bomber

squadrons participated in the Allied air raids against the strategic targets in Germany and supported the resistance movement in Poland and other countries by providing supplies and personnel. Polish pilots also supplied Great Britain with planes produced in the USA. Therefore, the personnel of the Polish Air Force were familiar with the equipment and the British regulations. They were also relatively well-versed in English. This was undoubtedly an asset, but not for the communist authorities which were imposed in Poland as a consequence of the Second World War. These experienced people posed a threat to these authorities. However, these people constituted a considerable asset of the human resources of the Pakistani air force which was being established. Among those who decided to sign contracts in Pakistan there were officers and soldiers with considerable experience in combat (veterans of the Battle of Britain, participants of air raids in Germany, cavaliers of Poland's highest military decoration - *Virtuti Militari* - and of British and Allied decorations). There were also young graduates of aviation schools who did not get to fight against the enemy but who sought work opportunities in the aviation profession due to the impossibility of going back to their country. Both air men (pilots, radiotelegraph operators, bombardiers, aerial gunners) and the ground crew (qualified mechanics and weapons specialists) served in Pakistan. This was a significant contribution to the initial stage of the establishment of the Royal Pakistan Air Force, which suffered from serious shortages of personnel after the British left the country before their local successors could be trained. The Polish officers and soldiers who decided to remain abroad in the West used to believe that the post-Yalta state of affairs was not permanent and that it would collapse during the course of another war, a Third World War. Therefore, they attempted to preserve and maintain their military experience and skills. This was quite difficult considering the European conditions, therefore they decided to serve in the Asian and African countries that were being established. In London there were also state structures of the Second Polish Republic: despite the gradual withdrawal of international recognition, the President, Government and the National Council of Poland, which performed the role of a parliament, functioned until the beginning of the 1990s. In the period which is treated in this book i.e. in the years 1945-56, the London community of Polish émigrés constituted a peculiar network of contacts between officers and soldiers who remained abroad and who still wanted to fight for an independent Poland. However, history took a different turn. The majority of these people had to arrange their lives in exile,

becoming important elements of the societies of Great Britain, the United States, Canada, Australia or South Africa. Some of these people returned to communist Poland after 1956, when the regime loosened its grip by relinquishing the pursuit of a strict, Stalinist line. In Pakistan, Polish aviation specialists filled the gap that arose after the majority of the British personnel withdrew. We may infer from the accounts at our disposal that these people were liked because they were open and friendly. They did not present the “superiority of the colonisers above the colonised” that was so familiar to the local people. This could have been a result of historical experiences: for almost 125 years Polish lands were partitioned by Germany, Austria (subsequently Austria-Hungary) and Russia. Foreign domination frequently differed little from the colonisation that was experienced by the Pakistani people. The two groups also shared similar experiences associated with the rebirth of their respective statehood. Both Poland in 1918 as well as Pakistan in 1947 had to face the problem of a very limited amount of resources left behind by their former superiors and turn them into a tool for the construction of an efficient state. This aspect was crucial due to the presence of unfriendly neighbours across the borders. Moreover, during the period when the foundations of statehood were laid both of these countries fought wars with their respective neighbouring countries: in 1920 Poland fought against Bolshevist Russia, and in 1948 Pakistan fought against India. In both cases these wars became an important element of a “founding myth”. One may also perceive a certain community of values between Polish and Pakistani officers which is discernible e.g. in the mottos of the armed forces: “Bóg, Honor, Ojczyzna” [God, Honour and the Fatherland] and “Faith, Unity, Discipline”. This aspect is also perceptible in the memoirs of those who participated in the events that are described. One may also doubtlessly perceive a passion in the performance of this difficult service, this peculiar esprit de corps which characterises and unites probably all airmen regardless of their nationality or religious affiliation. The reader should also remember that due to the Cold War the events that are described in the book were unfamiliar in Poland and in the West. The service of Polish airmen in the army of the country which remained on the other side of the Iron Curtain did not belong in the dialectic that was exercised by communist propaganda. The first person who broke through this wall of silence was Anna Pietraszek, who presented a documentary film entitled “Polskie Orłęta na pakistańskim niebie” [Polish Eaglets in the Pakistani sky], which featured Pakistani students of Polish instructors -

these students are currently retired senior officers. The Polish edition of the book which the reader now has before his or her eyes was not the first monograph devoted to this subject whereas in Pakistan there are practically no monographs devoted to the origins of the Air Force that would fail to mention General Władysław Turowicz and other Polish instructors. Over the course of many years the war stories of the ancestors faded away even in the memory of the families of the protagonists of this book. Poland was located on the other side of the Iron Curtain. Parents frequently failed to transmit their history to their children so that they could assimilate with the communities in which they were raised. The generation of the veterans of the Second World War passes on to the Eternal Service therefore it is extremely difficult to have access to the accounts of that time, including such places which were original places of service, as Pakistan for the Polish people. Therefore, the aim of the English edition is to familiarize the reader with this part of history, especially the reader who has a photograph of a great-grandfather wearing a Polish uniform in his or her family album. Those strong roots can be useful in re-establishing present military cooperation between Poland and Pakistan. We share common experience as the users of the US-made aircrafts like e.g. the F-16 generates common experience and possibility to share them by our pilots and pilot-training institutions. We share also common values as love of freedom, and deep patriotism. So, the heritage of the beginnings of the Pakistan Armed Forces and participation of the Poles in the process of its creation may be and shall be cherished, learned and discussed.

**3. Defence and Security Cooperation between Pakistan and Poland –
Expectations and Realities**

Robert Czulda,
University of Łódź, Poland.

Abstract

Although Poland and Pakistan are geographically far apart, they share many commonalities. There are also a number of untapped and unexplored fields of bilateral cooperation, that would be mutually beneficial to develop. One of such fields is defense, which is extremely important for both Poland and Pakistan. In a way, both countries are similar to each other - both invest in defense and want to develop their own defense industry capabilities. This paper examines the existing fields of defense cooperation, including in terms of defense industry, as well as the challenges and possible fields of cooperation that are yet to be developed.

4. Pakistan-Poland Relations: Pursuing a Joint Future via Cultural Relations and Diplomacy

Muhammad Yaqoub,
Fujian Normal University, China.

Abstract

This article's main goal is to examine how Pakistan and Poland's cultural ties have evolved into cultural diplomacy. The study analyzes the many phases through which cultural engagement between Pakistan and Poland has developed and recounts the historical and cultural interactions between the two nations before their establishment as contemporary republics. The author argues that culture is a unifying force since it fosters closer interactions between the two sides. Cultural diplomacy between Poland and Pakistan is paving the way for new communication channels, reflected in their political and economic ties. According to the paper, the lack of a strategic alliance encourages cultural diplomacy since it is a crucial building stone for future relationships.

5. Pakistan and Poland Relations: Prospects for Peace and Development

Sidra Ahmed/Rizwana Jabeen,
DHA Suffa University/Federal Urdu University Karachi.

Abstract

International world order is in transition. The economic crisis, digital revolution, environmental challenges and political conflicts are fixing the nations into new power centers. The polygonal challenges sweeping this time from West to East. Taking advantage of this challenging opportunity, Pakistan is exploring new partners to enhance its scope of diplomatic, economic and defense sphere of influence. Among all European nations, Poland has a unique historical, diplomatic and people to people relations with Pakistan which are subtle yet meaningful. Pakistan was one of the first Muslim countries to establish relations with Poland. Pakistan trade for more than half a billion Euros with Poland. Poland's location at the heart of the Europe serves Pakistan as the gateway to the European markets. Similarly, both countries have been enjoying strong defense ties since early 50s. These multidimensional sectors of cooperation and similarities will help us building exclusive partnership for peace and development inside and across the regions. Besides local components, external factors, and new partners are essential for sustainable peace and all-inclusive development in contemporary times. Pakistan and Poland may not only build cooperation for peace and development, but they may also explore more avenues for brining prosperity, diversity and collaboration to both countries which belong to two different regions yet share a mutual aspiration for peace and development.

6. Paradox of Maritime Security in Baltic Sea: Lessons for Poland - A Pakistani Perspective

Maliha Zeba Khan,
National University of Modern Languages (NUML), Islamabad, Pakistan.

Abstract

Seas remain at the core of connectivity and sustainability for the mankind, and their importance gets multifold with geographical location of states. Therefore, socio-economic growth and development of littoral states relies largely on maritime activities. Baltic Sea is one such maritime region that connects Northern Europe with rest of the world. It is hub of economic, trade, financial, and other flows to and from the region, but its geostrategic location harbingers the paradox of maritime security compelling the regional states to indulge more into traditional security thinking due to overwhelming presence of Russia and influence of NATO instead of focusing on contemporary issues like blue economy, ocean sustainability, and non-traditional maritime security threats and challenges. This research endeavors at investigating geostrategic vulnerabilities of Baltic Sea causing paradox of maritime security in that region due to which regional states, particularly Poland affixes themselves within traditional maritime security thinking. The proposed research intends to use qualitative method with further focus on explanatory research aimed at seeking lessons for Poland to bring in paradigm shift from traditional to non-traditional for dealing with maritime security paradox of the Baltic Sea Region (BSR).

7. Analysis of Geopolitical Dilemmas: A Case Study of Pakistan and Poland

Dashab Annus /Faisal Javaid,
Federal Urdu University Karachi.

Abstract

The study will provide an in-depth examination of the geostrategic challenges that Poland and Pakistan are confronting at the present time. On one hand, due to its position between two great nations, such as Germany and Russia, and the absence of any actual natural hurdles to either power, Poland has had one of the most turbulent histories of any country. Poland has had one of the most eventful histories of any nation. Poland was often a lot weaker than any of these powers, which left the nation's safety and independence at the mercy of its larger neighbours. On the other hand, due to its location, natural riches, and geopolitical position, Pakistan is now at a crossroads of promise and challenges. This is because Pakistan is a prisoner of geography. It is at the crossroads of the geopolitical ambitions of the world's most powerful nations and the burgeoning business possibilities of the Asian Century. Unhappily, a few nations in the area as well as those from outside the region are leaning more toward their competing strategic options rather than attaining their geopolitical aims via cooperative behaviours. These strategic calculations are generating a catastrophe on the strategic front for the whole region in general, and for Pakistan in particular. The study will give a comprehensive analysis of the geostrategic challenges that the two countries are now facing and will touch on an important aspect of their shared existence.

**8. Green Energy Cooperation between Pakistan and Poland, and Sustainable
Development: Prospects, Challenges and Way Forward**

Muhammad Amjad Raza/ Maliha Zeba Khan,
Government College University Faisalabad/National University of Modern languages.

Abstract

Energy requirement is pre-requisite for socio-economic growth, development and sustainability of the states in contemporary era; whereas extensive use of fossil fuel energy resources are damaging not only the strategic reserves but environmental degradation has come afore as a serious consequence. Since Europe is focusing more on green energy, that can be an effective alternative to fossil fuels for Pakistan ensuring socio-economic development as well as a protected, sustainable environment. Therefore, cooperation in green energy sector would prove quite efficient between Pakistan and European countries, particularly Poland due to its expertise in green energy production. Pakistan and Poland have cordial relations since 1962. However, there is not much trade and energy-related cooperation between the two states in which renewable energy is potential area of cooperation to deal with Pakistan's energy crisis. There are various opportunities for Polish investors available in Pakistan in this sector. Nonetheless, the undertaken research aims at analysing prospects while focusing on challenges coming in the way of green energy cooperation between Pakistan and Poland. As an outcome, the way forward will be suggested making it an explanatory research based on qualitative data. The increased bilateral cooperation according to the framework of neo-functionalism will pave the way for further economic ventures, eventually bringing positive impact on society and environment. This research will become a precursor for future research and socio-economic cooperation.

9. The Perception of Threat in Pakistani and Polish Political Discourses

Agnieszka Kuszewska,
Jagiellonian University, Poland

Abstract

The paper focuses on the perception of threat in historically inherited and current Pakistani and Polish political discourses. It aims to analyze both states' approaches towards powerful neighbours and tries to find similarities and differences of the threat-related official narratives in Warsaw and Islamabad. It also goes beyond regionalisms and addresses the approach of both states toward current global security dynamics with a focus on the perceived threats. How do both countries define security threats? Can we find any similarities in the state-led discourses? Could these perceived threats lead to better mutual understanding and cooperation, or, in contrast, there is no noticeable potential in this regard?

**10. Pakistan-Poland Avenues of trade, Case Study: Enormous Opportunities in
Information Tech Industry**

Muhammad Danish Khan,
Federal Urdu University Karachi.

Abstract

The IT industry in Poland is among the most advanced of the 23 nations in Central and Eastern Europe. The economic potential of Poland is substantial. Many foreign technology corporations, including Microsoft, Intel, Google, IBM, Delphi, Samsung, and many more, are prepared to invest in the growth of the Polish IT sector. Many of these businesses have already established R&D facilities in Poland. The objective of this research is to explore the opportunities for Pakistani professionals and firms can benefit from the emerging polish market and outsourcing Projects including (Software-as-a-Service, Platform-as-a-Service, Infrastructure-as-a-Service, Utilities Systems and could base services) since both countries possess great potential to cooperate in the IT market of FinTech, blockchain, E-commerce, automotive, and game dev sectors, This study delves deeper into the polish IT Companies' usage of brilliant and competent Pakistani experts, and organizations benefit from Cost-Effectiveness, Business-Friendly Infrastructure, Quick To Adopt The Latest Technologies, Language Proficiency, Highly Responsible, and other characteristics. Furthermore, this study suggests ways for Pakistani professionals to sell IT services in other EU countries by utilizing the Polish market. This Study uses mixed methods as a research methodology.

11. Pakistan-Poland Bilateral Cooperation on Cybersecurity: Challenges of Capacity and Relationship Building

Khushboo Farid Khan Ghouri/ Muhammad Arif Khan,
University of Karachi/ Federal Urdu University Karachi.

Abstract

In an information age and globalization, humans are bound to follow the algorithm set by artificial intelligence, which favors despotism, with nation-states advancing in this area. Before Covid-19, digitization was growing quickly. The pandemic boosted virtual communications, data flow, virtual meetings, etc. However, the digital world is used for many things, including cyber warfare, also called fifth-generation warfare, where perception and information battle are focused. In the new world order, where socio-economic, political, and military actions are directed towards keeping, increasing, or demonstrating power, nations use digital platforms to wage war in secrecy, making it the most dangerous type of warfare. Cyber warfare, such as information theft, hacking, cyberattacks, etc., threatens state secrets, security, and integrity. Cyberwarfare threatens not only developing states but also developed countries. This hybrid threat of cyber warfare is emerging in the case of Pakistan and Poland as well. Pakistan is vulnerable regarding cyber security, especially in the hands of her eastern neighbor, who has constantly been waging hybrid warfare against Pakistan. At the same time, the war in Ukraine is the first real cyberwar in Europe. Although the number of attacks in Poland has increased, large-scale impacts have not yet been felt. But still, cyberwarfare has been a useful tool for rivals to exploit already vulnerable areas and use them against states, be it military domain, religious sentiments, cultural icons, domestic ethnic, sectarian, and economic fault lines threatening the state's national security. Hybrid warfare strategy manufacturers must develop a comprehensive plan to prevent this threat. Since cybercrime is often transnational, international cooperation is needed to share best practices for protecting information infrastructures. Pakistan and Poland can deepen their operational cooperation by drafting a resilient framework and exchanging information on cyber threats to increase field protection. This paper will focus on the challenges and opportunities of such capabilities, capacity, and relationship building at the bilateral level to expand collaboration in dealing with cyber threats amid rapid digitization that has exposed the virtual world's vulnerabilities.

**12. Roads Lead to Connect: Prospects for Pakistan - Poland Relations in the
Context of Greater Eurasian Connectivity**

Uzma Siraj,
Federal Urdu University Islamabad.

Abstract

Pakistan and Poland are located at the two opposite ends of Eurasia. Being geographically apart and due to multiple security and political issues, both countries have not been able to establish strong economic relations. However, with the changing dynamics of the world, shifting of world's economic center to Asia, construction of cross continental road transport infrastructure and growing emphasis on regional connectivity, both countries are in a position to provide a solid base to their bilateral relations. The concept of regional connectivity through the China led infrastructure projects like BRI and its flagship project of CPEC provides a window of opportunity to both states for establishing strong bilateral economic relations. This could be a starting point for Pakistan and Poland to embark on a journey to establish strong relations in Asian century. This study explores that how Pakistan can become a gateway for Poland to enter and explore South and South East Asia through CPEC? It will discuss the prospective avenues of cooperation between Pakistan and Poland with the help of economic and trade data to ascertain the possibilities of closer bilateral relations in the context of greater Eurasian connectivity.

13. Pakistan- Poland Trade and Strategic Relations: Challenges and Opportunities in the 21st Century

Muhammad Ismail,
Karakoram International University, Gilgit.

Abstract

Due to its strategic location in the core of Europe, Poland is a significant country. Pakistan and Poland have special geographical significance on the continents of Asia and Europe. The two important nations are related to one another. Liaquat Ali Khan, Pakistan's first prime minister, began diplomatic contacts with the People's Republic of Poland after the country gained its independence on August 14, 1947, and on December 17, 1962, Pakistan became one of the first Muslim nations to establish diplomatic ties with Poland's then-communist government. In 1962, Poland established an embassy in Karachi; however, in 1965, it relocated to Islamabad Capital Venue. In 1969, the Pakistani government inaugurated its consulate in Warsaw. Right now, Poland additionally keeps an honorary Consulate-General in Lahore as well as a cultural Consulate-General in Karachi. 30,000 Polish refugees were housed in camps and settled in Karachi during World War II in Pakistan. Following the 2005 earthquake in Kashmir, Poland was one of the major donors of relief to Pakistan. When Zulfikar Ali Bhutto and Pervez Musharraf were in power, commerce and diplomatic relations improved. Polish and Pakistani ties in the twenty-first century have always been cordial, uplifting, and respectful, and we currently enjoy remarkable improvement in all sectors. Over time, transaction volume has stayed below \$370 million. Pakistan exports goods of \$265.5 million in 2020–2022, and Pakistan has benefited from the bilateral trade balance over the years. The opportunities and challenges are present for Pakistan and Poland in this time. Both countries needed to concentrate on their strong friendships, their ability to rely on one another, and their commercial and strategic, alliances.

**14. Remarks on the Polish Refugees in Pakistan. The Example of Country Club
Camp and Malir in Karachi**

Magdalena Kumelska-Koniecko,
University of Warmia and Mazury in Olsztyn, Poland.

Abstract

In 1941, as a result of the outbreak of the Soviet-German war, Joseph Stalin announced an "amnesty", which became a chance for the masses of brutally displaced Polish women and Poles into deep Siberia to return to their homeland. It was the beginning of a great evacuation of the Polish population under the wings of General Władysław Anders' Army, which found refuge in remote regions of the world - the Middle East, South Asia (contemporary Pakistan and India), Africa, South America and New Zealand. In 1942 so-called transit camps for Poles were established in Karachi. The Country Club Camp and Malir have become a safe haven for the masses of Polish people. The camps were organized by the delegate of the Ministry of Labor and Social Welfare of the Government in Exile of the Republic of Poland in London and the British authorities for Polish refugees who managed to get out of the USSR together with the Anders Army. In camps were schools, communities' centers, hospitals, churches, post offices, theaters and sports fields. Only in the Country Club Camp from August 24, 1942, to December 3, 1944, over 21,000 people passed through. Some Polish refugees remained in Pakistan. The aim of the speech is to save from oblivion the common Polish-Pakistani historical past, which should constitute the building blocks for multidimensional relations at the level of state governments, and above all, cooperation at the level of societies.

**15. Sheltering the Ukrainian Refugees: Implications for Poland in the Light of
Pakistani Experiences**

Amna Ali/Syed Shahabudin,
Federal Urdu University Karachi.

Abstract

Pakistan has taken in a sizeable number of Afghan refugees ever since the Soviet Union launched its invasion of Afghanistan at the height of the Cold War. This has resulted in significant repercussions for Pakistan. Some examples of this would be things like terrorism, drug trafficking, and human smuggling. As a result of the invasion by Russia, a significant number of Ukrainians will go for refuge in Europe, particularly Poland. They arrive in the tens of thousands at a time. You have the option of taking the bus, the train, or driving your own vehicle. On the Polish side of the border, the Ukrainians who have escaped the Russian bombardment of their cities are greeted with open arms by the Polish administration. In the last several years, there has been a migration of around one million Ukrainians to the United States from other countries, and this current wave of migrants will join them. In light of the fact that the fighting in Ukraine does not seem to be coming to an end any time soon, we investigate the potential long-term consequences for Poland of taking in such a huge number of refugees.

16. The Salt Deposits of Pakistan and Poland

Asma Kausar Jawed,
0Federal Urdu University Karachi.

Abstract

Pakistan has the second world largest salt deposits, commonly known as Khewra Salt mine or Mayo Salt mine, these salt mines are located at Khewra, North of Pind Dadan Khan, in Jhelum District Punjab province of Pakistan. Geologically the age of salt deposits is early Cambrian, these deposits are found in Salt Range Formation, these Salt Range is highly folded, faulted and distributed, the basal layers consists of crystalline halite, this layer is intercalated with potash salts. This basal layer is overlain by gypseous marl, which is all over covered by gypsum and dolomite interlayered beds with some seams of oil shale. The production per annum is 350,000 tons of 99% pure halite and estimated reserve of salt in the mine is from 82 million tons to 600 million tons. Poland has also salt deposits of great economic value, the rock salt deposits are found in two salt bearing formations of Upper Permian (Zechstein) and Neogene (Middle Miocene, Badenian stage) age. The Permian rock salt deposits also has potash salt, this Permian rock salt deposits is the largest deposits than the other deposits of Neogene age. The Permian deposits are located in the Northern and Central Poland. The Badenian salt deposits are very ancient nearly 750 years and are exploited over this period of time. These ancient salt deposits were finished in 1996 after exploitation, therefore the salt mines of Wieliczka and Bochnia turned into cultural heritage sites. Similarly, the exploited areas which left are turned into hospital in Khewra salt mines as well as for tourism. Tourists from all over Pakistan visit the rock salt mines each, year.

17. Pakistan in Poland's Foreign Policy. From the Past to the Present Day

Arkadiusz Żukowski,
University of Warmia and Mazury in Olsztyn, Poland.

Abstract

The origin of Polish-Pakistani contacts and their intensity will be analysed. With reference to the nowadays, the place and role of Pakistan in Poland's foreign policy priorities will be shown by analysing the exposés of Polish prime ministers and ministers of foreign affairs.

**18. Pakistani Perception of Sino-Russian Strategic Partnership in the Context of
the US Indo-Pacific Strategy**

Ewa Czarkowska,
University of Warmia and Mazury in Olsztyn, Poland.

Abstract

Pax Americana is gradually taken under revision in XXI century. The activity of two power centres, i.e. China and Russia, is one of the leading trend that challenge the global hegemony and strategic interests of the US in the range of the created multipolar order. Foreign politics of Beijing and Moscow, as well as the Sino-Russian relations model have influence on modern international relations and international security system. Analysis of these two powers mutual relations and how their cooperation affects other players takes on meaning in the academic debates. Undoubtedly, Pakistan is one of the country's, which takes a good look at the rapprochement of Russian and China under their own interests and goals in the Indo-Pacific transregional politics. The Sino-Russian strategic partnership in the geopolitical security system, where India and Pakistan interests are collided, is under the particular importance and all of this is in the context of the US anti-Chinese strategy, that combines Indian and Pacific Oceans. In effect, we are the witnesses of the “tectonic” changes in the geopolitics of this wide region.

19. Poland and Pakistan's Foreign Policies in Light of their Economic Prospects

Samreen Aamir/ Muhammad Mustafa Raza,
DHA Suffa University, Karachi.

Abstract

The European Union has painted a new picture for the world, one of bringing peace and prosperity through economic integration, trade, interconnectedness, and interdependence. This positive picture has changed the mindset of traditional thinkers who believe that only the race of arms and ammunition can maintain the balance of power and can bring peace to the world. International relations are now studied in a variety of ways. Diplomacy and foreign policy are designed to improve economic capabilities, and trade promotion is the natural result. It is now critical to conduct a thorough examination of the potential for trade and financial outcomes when establishing relations with other countries. Poland and Pakistan have a long history of friendship, despite the fact that we are thousands of miles apart. The first Polish explorers reached the current lands of Pakistan in the European Middle Ages. The first trade agreement with Poland was signed in July 1949, and we have maintained a healthy relationship ever since. However, despite having a good relationship, we have not strengthened our economic relationship to its full potential. It is important to study the different sectors and potential growth and design our relationships in this context. As an agrarian country, it is critical to prioritize agricultural products that can be exported to Poland and other nearby European markets. This research paper is a case study of Pakistan-Poland relations, based on historical and current events concerning the two countries foreign affairs in general and economic interconnectedness in particular. For this purpose, we used a straightforward research methodology that included both primary and secondary sources such as scholarly works, research articles, reports, case studies, and dissertations, to name a few. The secondary analysis methodology makes use of qualitative and quantitative data provided by other scholars and organizations.

20. Polish Officers’ Role in Establishing Royal Pakistan Air Force (RPAF)

Zahid ul Hassan,
Federal Urdu University Karachi.

Abstract

Homeless and betrayed WW-II Polish air warriors entered into a contractual obligation with resource scarce nascent state of Pakistan to establish RPAF. The Polish contingent of 30 airmen under the leadership of Sqn Ldr Wladyslaw Turowicz, a test pilot himself and later commonly known as “Turo”, landed at Karachi in 1948 to establish Technical Training institutes and a Flying Training academy. His wife Zofia also taught paragliding to RPAF cadets. Polish pilots and technicians were not only extensively trained, possessed latest knowledge about airmanship and very skillful but also brought with them rich war time experience of WW-II. They went on to establish RPAF’s Operational, Training, Maintenance and Air Transport commands and also played significant role in establishing Space program, Missile technology and National airline of Pakistan. PAF has erected a monument at its museum however, quantum of their rendered services doesn’t correspond to the optics. Very few writers have ventured into the subject that too limited to a few articles and the available literature about their contributions in open source is too scanty. Scrutiny of the available study material reveals that so far, no qualitative or quantitative research has been carried out on the subject. Therefore, major objectives of this study are; firstly, to explore true extent of their contributions especially with respect to tactical details in their respective fields of service secondly; to understand that, is present edifice of excellence of PAF built on the prowess of Polish aviators? lastly, to produce a qualitative and quantitative manuscript.

21. Pak-Poland Relations: Exploring New Avenues and Opportunities in Changing World Order

Ahmed Raza/Aatir Rizvi,
Govt. College University, Lahore

Abstract

Although both Pakistan and Poland seem belonging to two different domains, not related to each other apparently; yet in the midst of ever changing technological, geo-political and geo-economic environment both share some commonalities and avenues are open for both to cooperate and secure their goals at regional as well as, international level. When it comes to commonalities, their foreign policy principles, diversified population, geographical and strategic importance and threat perceptions are to some extent converge; where they have long historical ties starting from pre-independence of Pakistan since 1940s when Karachi hosted almost 30000 Polish refugees after WWII. The technological advancements have made the world a global village, where distance is not a barrier for economic activity and the ever changing world order where current international atmosphere is full of uncertainties and instabilities, has opened new windows of opportunities pertaining to new markets; technical, scientific and industrial collaborations; agricultural and cultural relations; educational and people to people contacts, as well as, maintaining all levels of strategic communications and exchanges in various fields. This article will trace back the historical perspective of Pak-Polish relations and jog down various opportunities and strategies for both nations. Pakistan has not properly explored the Polish market and for Poland too, the economic zones in Pakistan under CPEC can serve the purpose for mutual advantage. The article will also provide few recommendations for strengthening further relations between both states.

22. Pakistan-Poland Economic Relations and Regional Connectivity: Challenges, Opportunities and Way Forward

Manzoor Afridi/ Naveed Anjum,
International Islamic University, Islamabad, Pakistan.

Abstract

Pak-Poland relations have pre-partition history when in 1944, Nazi Germany attacked the USSR, and almost thirty thousand Polish refugees were settled in Karachi. In 1947, after the Independence of Pakistan, Poland helped Pakistan to establish its air force, its officers participated in Indo-Pakistan 1965 war and helped to launch the space program. The trade relation between both countries flourished during the Government of Zulfikar Ali Bhutto but their relations reached new heights when, Poland became a democratic republic in 1989, joined NATO in 1999 and became a member of the European Union in 2004. Poland's support for Pakistan to get GSP Plus in the EU and President Pervez Musharraf's first ever visit as a head of state helped to reach their bilateral trade to €500 million in 2018. Both countries have the potential to increase trade in the fields of oil & gas, maritime, energy, technology, infrastructure and tourism but both should increase regional connectivity. The vital location of both countries can provide them with a unique opportunity to increase regional connectivity but, initially, both have to ensure the availability of direct air connectivity, people-to-people contact and availability of easy visas and immigration policy. The future of their bilateral relations depends upon how both countries will find the solution to the prevailing issues and what actions both will take to facilitate trade and connectivity.

23. Jean De Bloch's Theory of The Future War and Its Relevance to The Security of Pakistan

Ahmad Raza,
DHA Suffa University, Karachi Pakistan.

Abstract

Herbert George Wells (1866-1946), unquestionably the most prolific British writer of his time deplored the mindset which constricted the sphere of knowledge within the self-conceived domain in the west, especially Britain where foreign sources were discarded being labeled as curtailed interpretations and belated translations. This particular attitude of prejudice of intelligentsia deprived people, especially the future generations to enhance their knowledge. This particular ethos based on false sense of superiority prevalent in the Western Europe, especially Britain discredited Jean de Bloch, a Polish banker, financier and above all, an inventive thinker with an exceptional philanthropic attitude who was divined to glance into the future while his contemporaries lurched into the oblivion. He conducted an apostolic study on the future of war with predominant emphasis on the industrial economy and subsequently created a classic research work on the industrial fold of warfare impacting politics, economy, and most of all, the sociological order of warring nations. Unambiguously, de Bloch was one of the most remarkable personalities of his time, who equipped himself with unprecedented extent of practical knowledge on the future war and demonstrated exceptional aptitude for strategic organizational abilities with extraordinary potentials for hard work, exclusively for the humanistic cause, irrespective of any religion or race. According to the most notable strategists of their times like Fuller, Howard, Liddell Hart, Paret, Pitner, Tuchman and Travers unanimously contend that Bloch was the singular thinker who comprehended the modern warfare with its multifaceted implications. But the architects and proponents of British, French, German and Austro-Hungarian empires immersed into nostalgic mood of superiority and blinded by the glitter of extravagance ridiculed de Bloch as a dreamer; a notion that distinctly reflected their inability to confront a visionary on the rational scale. Regrettably, the similar geopolitical scenario exists in South Asia which directly poses the existential threat to the security of Pakistan. Foregoing in view, an earnest endeavour has been made to briefly discuss the gist of Jean de Bloch's theory of the 'Future War' within the context of multifaceted security issues confronted by the people of Pakistan and, subsequently

proffer de Bloch’s suggested ways-out to the leadership of Pakistan which is presently passing through unprecedented miseries of socio-economic and environmental threats.

Keywords: de Bloch’s Theory of the Future War, Security threats to Pakistan.

24. Pakistan-Poland Political Relations: Challenges and Opportunities

Ayesha Ashfaq,
The University of Lahore.

Abstract

Since the beginning of the 21st century, the world has been witnessing profound and great changes. It has entered the era of multi-polarization, and formal relations between states have become increasingly complicated and diverse in recent years. Constructing a new-type relationship with other countries has become the main objective for states in the current political scenario. Keeping their national interests in mind, Pakistan and Poland are trying to establish diplomatic, strategic, defensive, and cultural relations with each other in a new direction. Although both countries established their diplomatic relationship in 1962, the Pak-Polish friendly ties have been overlooked by both states' media during the Cold War Period. In 2007, after the visit of President Pervez Musharraf to Poland, both countries opened a new chapter of cooperation in different development programs. In the current trend of globalization, multilateralization, and diversification of foreign relations and international integration, both states have great importance in global politics and international stability due to their strategic locations. Building up relations of mutual understanding, trust, equality, and reciprocity between Pakistan and Poland can play an important role in underlying the peace, prosperity, and stability of not only the two states and their regions but the world as a whole. With mutual cooperation, both states, especially Pakistan, can diminish political constraints to attaining development goals. In this changing world, Pakistan and Poland are also encountering some political challenges. A growing population, national and regional security, violations of human rights, threats to human security, terrorism, climate change, natural disasters, persistent poverty, economic downturns, political discrimination, regional and international political pressures, etc., are such challenges that can damage the Pak-Polish friendly relationship. The purpose of this research paper is to identify some political opportunities and challenges in Pakistan-Poland relations. It will also give some recommendations to both states on how to achieve their development goals with mutual cooperation.

25. The Dynamics of Pakistan-Poland Relations: The Prospects and Challenges in the Era of Geo-economy

Syed Sibtain Hussain Shah,
National University of Modern Languages (NUML), Islamabad, Pakistan.

Abstract

The paper analyses the dynamics of relations between Pakistan and Poland from historical, economic and futuristic perceptions. Aim of this research is to identify the prospects and challenges concerning bilateral economic cooperations in the changing geo-economic environment. Pakistan and Poland ties are founded on a solid base which provides a durable source of the collaboration in the emerging geo-economic atmosphere. As there is a huge potential of mutual cooperation in the era of geo-economy, the author set 2004-2021 as a timeframe for this study. The descriptive method is to be used in the study while applying relevant assumptions of the liberalism in the international relations in the light of a model of inter-state relationships. By using primary and secondary data, the researcher will address the question that how bilateral ties of both countries is important and how Pakistan can be benefitted from the experiences of Poland which is a member of a large economic block of European Union since 2004 and currently playing an important role of economic development in the region. The bilateral relations deal with the various challenges but prospects of the relations must not be ignored specifically relations of Pakistan with Poland a country perceiving as a rising economy in the post 2004 era. The historical aspect of the relations between the two countries would also be part of the study in order to understand the importance of the present mutual cooperation between the two friendly countries. The author examines the growing importance of economic ties in the wake of fast changing developments in the world. This research would be an significant study as the economic relations between and among the states has been constantly significant in the world. Keywords: Pakistan, Poland, Bilateral relations, Geo-economy

26. Historical Review of Pakistan-Poland Defense Relations and Opportunities for Future Cooperation

Muhammad Naveed Akhtar,
Federal Urdu University Karachi.

Abstract

Contributions of the Polish individuals are significant for Pakistan's defense forces. After World War II, many Poles refused to go back to communist Poland. Some Polish soldiers decided to come to Pakistan. Pakistan-Poland defense ties could be traced back to 1948 when a Polish pilot along with a group of about 30 men contracted to serve in Pakistan Air Force. Poland remained under influence of the USSR during the Cold War era. After the collapse of the USSR, Poland became a democratic country. Poland was under Soviet influence and due to the Russian tilt towards India in a strategic partnership, Pakistan's relations with Poland were at a modest level. After the visit of President Musharraf of Pakistan to Poland in 2007, relations between Pakistan and Poland gained momentum. Poland officials have visited Pakistan many times for military cooperation. Pakistani officials also visited Poland to development of defense relations with Poland. Pakistan and Poland have expertise and capabilities in arms production. Pakistan Ordnance Factories (POF), Pakistan Aeronautical Complex (PAC), and Polish Armaments Group (Polska Grupa Zbrojeniowa", PZG) have opportunities for collaboration in the future. Defense industries of Pakistan and Poland can get advantage to avail benefits from each other. This paper presents a historical review of Pakistan-Poland relations and also explores fields for future defense cooperation.

27. Polish Perspective on the Development of Pakistani-Polish Cooperation in the Military Field

Piotr Lotarski,
University of Warmia and Mazury in Olsztyn, Poland.

Abstract

The aim of this article is to examine military cooperation between Poland and Pakistan and to indicate possible fields of strengthening these relations. At the outset, it should be emphasized that both countries have had permanent diplomatic relations since the 1960s. Poles, especially General Władysław Turowicz, had a significant impact on the development of Pakistani civil and military aviation and the space program. The military relations of both countries have many development perspectives ahead of them. Currently, they are conducted at a low level, especially in the field of arms sales, the balance of which has not exceeded several hundred thousand Euro per year in recent years. Both Poland and Pakistan have developed similar types of armed forces and a defense industry. The Pakistani industry produces tanks, combat vehicles and small arms. Importantly, he produced nuclear weapons and rockets to carry them, which exceeded Polish experience. The Polish defense industry produces modern combat management systems, fire control systems, high-class optoelectronic devices, radars of various types, artillery weapons, anti-aircraft missiles and UAVs. It also produces wheeled armored personnel carriers Rosomak, proven in Afghanistan, and the ultramodern IFV Borsuk. He has extensive experience in the modernization of post-Soviet equipment. The course of the war in Ukraine confirmed the high quality of Polish weapons. Polish special forces considered to be one of the best in NATO countries have experience from years of operation in many regions of the world, including Afghanistan. The increase in the intensity of Pakistani-Polish contacts after 2001, visits to the highest levels of representatives of both countries, and the signing of a memorandum of cooperation by the Ministry of National Defense in 2017 of both countries created the conditions for the intensification of contacts. Particular attention should be paid to the possibilities of training military personnel or cooperation of the defense industry.

28. Pakistan-Poland Political Relations in General (Rtd) Pervaiz Musharraf Era

Sabeen Azam,
Greenwich University, Karachi

Abstract

In this present global era, the cardinal relation with the states is very import. As Pakistan is a country with great geo-political and strategic importance. That is why Pakistan tries to boost and channelize the diplomatic tools to tie these relations not only politically, but economically and sterically too. Pakistan is being among the first Muslim countries to develop the relation with Poland in 1962. These relations went through many stages. This research specifically analyzes the Pak-Polish relations in the General (Rtd) Pervaiz Musharraf time period. This time was important as it was a new beginning of Pak-polish relations after cold war in 2007. At present both countries are mutually involved in many ventures. These ventures are both enhancing the soft and hard power of both countries. The analysis of this study is based on secondary data. The findings conclude that Pak- Polish relations are important and been flourished in that specific time period. This study recommend that the bi-literal relations are very important, and Pakistan needs more diplomatic efforts to cultivate progressive outcomes from theses relations.

Section Six: Profiles of the Session Chairs and Paper Presenters

1. Prof. Dr. Moonis Ahmar

Dr. Moonis Ahmar is former Chairman, Department of International Relations, former Dean Faculty of Social Sciences and Meritorious Professor of International Relations at the University of Karachi. He is also Director, Program on Peace Studies and Conflict Resolution. His field of specialization is conflict and security studies focusing on the South and the Central Asian regions.

Dr. Ahmar has 36 years of academic experience in Pakistan and in different foreign universities and research think tanks. He is the author of four books, four monographs and has edited 15 books on different themes of International Relations. Dr. Ahmar has published his research in international journals like Asian Survey, BIISS journal, Central Asia, Contemporary South Asia, Eurasian Studies, Foreign Policy Research Journal, IPRI journal, Journal of European Studies, Journal of Political Studies, Journal of South Asian and Middle Eastern Studies, Journal of International Relations, Margalla Papers, National Development and Security, Nepali Journal of Contemporary Studies, NDC Journal, Pakistan Horizon, Pakistan Journal of American Studies, Pakistan Perspectives, Pakistan Vision, Regional Studies, Strategic Studies, Strategic Analysis, Strategic Thought, South Asia Journal, South Asian Studies and World Affairs.

Dr. Ahmar has worked on several research projects related to terrorism, conflict and security studies and has received research grants from the Ford Foundation, Ploughshares Fund, Higher Education Commission, Islamabad, Research Facility Center, University of Karachi, U.S. Institute of Peace, Asia Fellows Program and Regional Center of Strategic Studies, Colombo.

Dr. Ahmar has been the recipient of Best Teacher Award from the Higher Education Commission, Islamabad, UNESCO, UN Commission for Human

Development and the Federal Ministry of Education, Islamabad. Dr. Ahmar was also a Visiting Fellow, South Asia Program, Institute of Defence and Strategic Studies, Ragaratnam School of International Studies, Nanyang Technological University, Singapore and was doing research on: The Challenge of Extremism in Pakistan: Are there lessons to be learned from Singapore?’

Dr. Ahmar held post-doctoral positions at the Arms Control Program, University of Illinois at Urbana-Champaign, Stimson Center, Washington DC, Middle East Institute, Washington DC, Center for International and Strategic Studies, Washington DC, Kroc Institute of International Peace Studies, University of Notre Dame, Indiana, United States, Asia Fellow, Department of International Relations, University of Dhaka, Bangladesh, London School of Economic and Political Science, U.K, Max Planck Institute for Foreign and International Criminal Law Freiberg, Germany and Willy Brandt School of Public Policy, University of Erfurt, Germany and LSE Ideas, London.

From April 2010 till February 2012, Dr. Ahmar was a DAAD (German Academic Exchange Program) Visiting Fellow, Conflict Studies and Management Program, Wills Brandt School of Public Policy, University of Erfurt. Apart from teaching c courses to MPP students on Conflict Management in Central Asia and Conflict Transformation in South Asia He was also working on his research project entitled, “Conflict Management and Vision for a Secular Pakistan?” His book, Conflict Management and Vision for a Secular Pakistan: A Comparative Study published by the Oxford University Press got the second peace prize in Karachi Literary Festival, February 2015. Dr. Ahmar was Jinnah Fellow, LSE Ideas from January-April 202

2. Prof. Dr. Uzma Shujaat

Dr. Uzma Shujaat (Ph.D.) is a Professor at Area Study Center for Europe (ASCE), University of Karachi. "Comparative Study of Women in Conflict; with Special Emphasis on Europe, Africa, the Middle East, and South Asia," was the dissertation's title. Her M.Phil. research/dissertation, which she finished before earning her PhD, was titled "British Foreign Policy vis-à-vis Pakistan during the Afghanistan Crisis."

She has been a faculty member at the Area Study Centre for Europe, University of Karachi, for more than 25 years as a part of teaching and research (since 1993). She has taken part in a number of EU-sponsored programmes and projects for European studies. Seven universities from Europe and Asia participated in the three-year (2006–2009) CLIMA Project (Euro-Asia Link Research Programme). Universities in Amsterdam, Beijing, Karachi, Paris, and Venice hosted training programmes.

She served as an online tutor for the CLIMA degree programme, whose course material was created by the students and instructors of the CLIMA Project. She has also participated in and graduated from the esteemed Salzberg Seminar. From July 2009 to April 2010, she also worked as a part-time consultant for DAI (Delaware Corporation, USAID), Maryland, USA, on short-term research projects for lawmakers.

She has been supervising the MS/M.Phil. and Ph.D. students' post-graduate research projects as a faculty member. She has routinely contributed research pieces to books and periodicals published both nationally and internationally. She has organized/led numerous international seminars and workshops, as well as taken part in them.

3. Brig. Prof. Dr. Saeed Minhas

Brigadier Dr. Ahmed Saeed Minhas was commissioned in Pakistan Army in March 1990. During his 36 years' service years, Brigadier Minhas has been on sensitive appointments including United Nations Military Observer at Congo, Brigadier (Internal Security) in a deployed Infantry Division in Baluchistan besides unique experience of serving as an arms controller at Arms Control and Disarmament Affairs Branch of Pakistan Strategic Plans Division (SPD) for seven years.

During his stint at SPD, he has been looking after Pakistan's strategic program from political and diplomatic perspectives and successfully represented Pakistani perspectives on different strategic issues domestically and around the world.

He did PhD in International Relations from Quaid-e-Azam University, Islamabad and has the honor of being fellow of "Center for Non-Proliferation Studies (CNS)", California, and "Sandia National Laboratories", New Mexico, USA.

Brigadier Minhas is currently the Pro Vice Chancellor at DHA Suffa University, Karachi since 2019.

4. Orazio Maria Gnerre

Orazio Maria Gnerre is a Graduated in Political Science and International Relations, and in European and International Policies at the Catholic University of the Sacred Heart in Milan. He is the author of various books and scientific articles.

5. Dr. hab. Aleksander Głogowski, prof. UJ

Aleksander Głogowski, is a professor at Jagiellonian University, has graduated from the V Secondary School in Cracow in 1994, and in 2018 he was appointed head of the department of international relations strategy at the Jagiellonian University's Institute of Political Science and International Relations. In 2013, he was appointed Associate Professor at Jagiellonian University. Doctor of Philosophy, Faculty of International and Political Studies, Jagiellonian University, 2004.

He has worked at Visiting Researcher-Institute of Strategic Studies, Islamabad/Pakistan - 2003, Project member: “Lessons Learned – Fundamental insights form the communications related to the withdrawal of a military mission by the example of withdrawal of German ISAF contingent in 2014”. - Universität der Bundeswehr München, Germany, 2017 Academic Hospitality School of Oriental and African Studies (SOAS) London, 2009; Visiting lecturer (Erasmus program) Vilnius University, Institute of International Relation and Political Science, Vilnius 2014 Member of Editorial Advisory Board of "Central Asia" Journal of Area Study Centre-Peshawar University. Member of Royal Society for Asian Studies, 2004 Member of: Royal Society for Asian Affairs (2013), Polish Society of International Relations (2013) European Association for South Asian Studies (2014), Polish Geopolitical Society – member of Scientific Council (2016) Advisor of Ministry of National Education and Science (2021) Prizes: Prize of the Rector of Jagiellonian University for outstanding research skill 2006, 2012, 2013, 2015, 2016

6. Dr. Robert Czulda

Robert Czulda (Ph.D.) is an Assistant Professor at the Foreign Policy and Security Faculty of the University of Łódź, former researcher at University of Maryland (2017 – 2018, Fulbright Senior Award) and freelance commentator on Iran for Atlantic Council in Washington DC. Visiting Professor at Islamic Azad University in Tehran (2016), National Cheng-chi University in Taipei (2013) and universities in Indonesia, Brazil, Turkey and the United States. Former intern at the “Young Leaders Dialogue” programme, organised by the Department of State (2010-2011), and a winner of the De Brzeznie Lanckoronski Foundation’s scholarship (2014).

7. Muhammad Yaqoub

Muhammad Yaqoub is a Ph.D. scholar at School of Communications, Fujian Normal University, Fuzhou, China. His major is film and drama studies. He has taught mass communication, communication, film theories, and research methods for more than seven years. He has two years of experience in editing and writing features. He worked as a data collector for over six months. He has talked about six research papers at conferences by well-known universities in China and Pakistan. He got excellent paper awards with a 500 RMB prize and a certificate from the School of Arts, Peking University. His research interests are using both qualitative and quantitative methods to investigate the OTT platform users and cinemagoers from the perspective of their watching films; and using discourse analysis approaches to study cultural diplomacy, Asian cinema, the Chinese film industry, Hollywood, Bollywood, and Lollywood's past, present, and future under the impact of the pandemic phenomenon. He is the author of one book on the media and public agendas. He wrote over eight articles in HEC Pakistan-recognized journals. He also works as a reviewer for the WOS Emerging Sources Citation Index, FWU Journal of Social Sciences.

8. Sidra Ahmed

Sidra Ahmed is working as a senior lecturer and programme manager for DHA Suffa University. Moreover, a Ph.D. student in International Relations from the University of Karachi. interested in identity politics, strategic studies, foreign policy, and the study of religion.

Sidra Ahmed holds 17 years of diverse professional experience in various fields including corporate sector, broadcasting, teaching, research and education management. She is Ph.D. scholar in the field of international Relations from University of Karachi, and, certified in Human Resource Management from the Institute of Business Administration (IBA), Karachi. Her Ph.D. dissertation presented antithesis of popular, media generated perceptions of European Muslims, the challenges they face in Secular Europe due to their religious identity and further irradiates the possible way forwards to solve their problems. Sidra Ahmed has 6 research articles on her credit. Besides teaching and research, she is a well-known political commentator & analyst of TV and newspapers. She is also a digital media content creator, anchor and producer of a YouTube channel “World Views by Sidra Ahmed” where she discusses national and international issues, and also educate the students of IR. Right now, she is associated with DHA Suffa University as senior lecturer and manager of BS International Relations Program. Her key areas of research are IR theory & political philosophy, power politics, foreign policy analysis, human rights, non-traditional security, media & information warfare.

9. Dr. Maliha Zeba Khan

Dr. Maliha Zeba Khan works as an Assistant Professor at the Department of International Relations, National University of Modern Languages (NUML), Islamabad. Her area of research includes Foreign Policy Analysis (FPA) and Foreign Policy Decision Making (FPDM), maritime affairs, maritime security, and all dimensions of ‘Blue’ including Blue Economy and Blue Diplomacy. Her significant academic contribution is in the areas of non-traditional maritime security (NTMS) and policing at sea. She has introduced several courses at BS and M. Phil. levels about different areas of maritime domain, e.g. “Politics of Sea”, “International Maritime Affairs”, “International Politics of Indian and Pacific Ocean Regions”, and “Geopolitics of Indian Ocean and Maritime Potential of Pakistan”. She provides consultancy to national and international stakeholders in maritime domain.

10. Dashab Annus

Mr. Dashab Annus graduated from Federal Urdu University with a BS Hons in International Relations. He is working on his MS thesis while also working for a research organisation. His interests include Asia, the Middle East, and the European Union.

11. Muhammad Amjad Raza

Muhammad Amjad Raza is a research scholar in Political Science. Presently, he is doing PhD studies at GC University Faisalabad. His areas of research include Non-traditional security threats, Environmental Politics and Sustainable Development and Foreign Policy Analysis (FPA). He is an excellent researcher with strong academic writing and verbal skills. His ability to conceptualize problems, organize thoughts, identify important data or facts, and present a balanced scholarly argument is extremely impressive. He is a quite remarkable scholar with a strong research interest. He has the excellent ability to draw on his own experience and observations to develop thoughtful opinions on a variety of issues. His current focus on contemporary issues, particularly, environmental politics highly appreciable. His research article has been published in the Central Asia journal. His research work is available in well-known research online repositories.

12. Dr. hab. Agnieszka Kuszewska, prof. UJ

Agnieszka Kuszewska (Ph.D.) is a political scientist, an Associate Professor at the Institute of Middle and Far East, Faculty of International and Political Studies, Jagiellonian University in Krakow. She did her Ph.D. on conflict escalation and de-escalation dynamics exemplified by the Kashmir conflict and habilitation on socio-political and security related challenges in Pakistan. She delivered guest lectures at the Tashkent State University of Economics in Uzbekistan, Quaid-e-Azam University in Islamabad, Christian Forman College in Lahore, University of Latvia, Riga, and others.

13. Muhammad Danish Khan

Muhammad Danish Khan, an IR Analyst out of passion, runs a business called MD-ULTRA DESIGN that offers IT exports research and development (Cad/Cam) (Area of Interest in Middle Eastern Countries).

As an owner, primary responsibility of CEO is to take the company's growth and expansion to the next level. The company's main customers are currently located in the USA, Singapore, and South Korea, and we worked directly on R&D projects for major semiconductor companies like Intel, IBM, and Samsung.

As a business owner, market demand is to earn from the European market, especially "Poland," which is currently home to the region's top IT sector. We believed in Creativity & Innovations, Client focus, Quality, Responsive, Continuous Improvement, and Teamwork for our Customers.

As an IR Analyst, I did work on some research papers related to Middle Eastern politics and always have a great passion to explore US Diplomacy towards Iran and Saudi Arabia and a close eye on events happening in these countries.

14. Khushboo Farid Khan Ghouri

Khushboo Farid Khan Ghouri is M.Phil. Scholar, Researcher, and lecturer of Comparative Politics and Global Issues in the International Relations department at the University of Karachi, Pakistan.

She has been actively involved in research work. Tea Break: 4:30-5:00 PM		

Section Eight: Detail about the Venue

Detail about the Venue

1st 0Pakistani-Polish International Scientific Conference will be held at CITY CAMPUS on 6-7 December 2022. IBA City Campus is located exactly in the hearts of the business sector in the city. IBA city campus situated at Kayani Shaheed Road, Garden Road spreads over 3.5 acres which makes a total of 53.5 acres of land for both the campuses. Address of IBA City Campus is Plot # 68 & 88 Garden, Kiyani Shaheed Rd, Karachi, Karachi City, Sindh, Pakistan, 74400.

Section Nine: Detail about the Partners of the Conference

1. Higher Education Commission (HEC), Islamabad.
2. Polish Political Science Association (PPSA)
3. Institute of Business Administration, Karachi
4. Area Study Centre for Europe, University of Karachi
5. Pakistan Journal of International Affairs (PJIA)
6. Department of International Relations, DHA Suffa University Karachi

1. Higher Education Commission (HEC), Islamabad.

The Higher Education Commission of Pakistan is an independent, autonomous, and constitutionally established institution of primary funding, overseeing, regulating, and accrediting the higher education efforts in Pakistan.

The Higher Education Commission (colloquially known as HEC) is a statutory body formed by the Government of Pakistan which was established in 2002. Its main functions are funding, overseeing, regulating and accrediting the higher education institutions in the country.

It was first established in 1974 as University Grants Commission (UGC) and came into its modern form on 11 September 2002 after Atta-ur-Rahman's reforms, which received international praise. The commission is responsible for formulating higher education policy and quality assurance to meet the international standards as well as providing accrediting academic degrees, development of new institutions and uplift of existing institutions in Pakistan.

The commission also facilitated the development of higher educational system in the country with the main purpose of upgrading the universities and degree awarding institutes in the country to be focal point of the high learning of education, research and development. Over several years, it has played an important and leading role towards building a knowledge-based economy in Pakistan by giving out hundreds of doctoral scholarships for education abroad every year.

2. Polish Political Science Association (PPSA)

Polish Political Science Association (PPSA) was established in 1957, but Poland is a member of International Political Science Association (IPSA) since 1950. PPSA is the only one association grouping the political scientists in the country. PPSA has 18 branches in Polish cities and within the association functions 10 research sections. PPSA co-publishes two periodicals which have an acknowledged scientific reputation: quarterly "Athenaeum. Polish Political Science Studies" (two issues in English in a year), <http://www.athenaeum.umk.pl/podstrony/english.html> and "Polish Political Science Yearbook" which became a quarterly journal and is a leading peer-reviewed Central European journal of political science, international relations, public policy and security studies, being published since 1967, <http://www.marszalek.com.pl/yearbook/> PPSA every year organises theoretical and methodological workshops as well as awards a prize for the best PhD thesis in political science. Since the beginning PPSA representatives are strongly represented in political science international associations, now e.g.: member of IPSA Executive Committee, member of European Consortium of Political Science Associations Executive Committee, member of Central European Political Science Association (CEPSA) Executive Committee, member of European Consortium for Political Research (ECPR) Executive Committee, Central European Political Science Association (CEPSA) National Representative, chair of IPSA RC 13, chair of IPSA RC 21, vice-chair of IPSA RC 12, vice-chair of IPSA RC 14 and members of Executive Boards of other IPSA RCs. Poland hosted the 24th World Congress in Political Science in Poznan (23-28 July 2016) with almost 3,000 participants from 99 countries.

3. Institute of Business Administration, Karachi

IBA, Karachi has two campuses: main and city campus. Situated at the University of Karachi, IBA main campus is spread over 23 acres of land for educational facilities, 22.5 acres of residential complex and 4.5 acres of boys' hostel, adding up to 50 acres of land. IBA city campus situated at Kayani Shaheed Road, Garden Road spreads over 3.5 acres which makes a total of 53.5 acres of land for both the campuses.

The expansion of IBA over the years has been due to the developmental strategy, introduction of new programs and the hiring of qualified faculty. The institute has planned to establish two additional satellite centers/campus in North Nazimabad Town and Defence Housing Authority.

Both existing campuses have undergone a major revamp since 2008. It includes refurbishment of some buildings and addition of some new state-of-the-art buildings. The development of new facilities and infrastructure at both the campuses includes construction of 10 new multi-storied buildings comprising of academic blocks, one specially designed building for the Center for Entrepreneurship Development, Student Center Complex with indoor sports, an auditorium, technology building housing a disaster recovery for ICT, Martin Dow Clinic, a 14-storied multipurpose Aman Tower and three hostel buildings. Additionally, five ancillary support buildings have been constructed including central power building, sewerage treatment plant, stores. Eleven existing buildings were remodeled, expanded and refurbished as part of the development strategy. IBA had 47 functioning buildings in 2017 and 29 in 2000 as a result of revamping of facilities and infrastructure. The covered area under instructional, administrative and amenities space has correspondingly increased from almost 230,000 sq.ft. to 696,000 sq. ft.

The main campus located within the boundaries of the University of Karachi comprises of around 40 classrooms, eight seminar rooms, five computer labs, and 14 breakout rooms. These are located in the three academic buildings, namely the Adamjee Academic Center, Abdul Razzak Tabba building and the Aman Center for Entrepreneurial Development. All instructional spaces are centrally air-conditioned and fully equipped with the latest audio-visual and video conferencing facilities to boost the overall learning experience. These academic facilities are augmented by the Ghani and

Tayyab auditorium which has a seating capacity of 300, a library, a video conferencing lab and a faculty lounge.

Additionally, the main campus houses a sprawling Student Center, complete with gymnasiums for both male and female students, a large cafeteria, an event hall, indoor table tennis and badminton courts, outdoor sports field for cricket and football, tennis courts, a volleyball court, a basketball court, a jogging track and a 450-capacity amphitheatre.

The city campus is at the heart of the business district of Karachi. It consists of the Aman Tower, Chinoy Administration Building, Faysal Bank Academic Block, Habib Bank Academic Building, Center for Executive Education, which together fields excellent premises for various programs. Existing facilities include 28 classrooms and eight computer/ICT laboratories. The city campus has Center for Executive Education (CEE), Center for Excellence in Journalism (CEJ), Center for Information and Communication Technology (CICT), Center for Business and Economic Research (CBER) and Centre for Excellence in Islamic Finance (CEIF), which are fully functional and situated in the 14-storied building complex known as the Aman Tower. To meet the growing needs of faculty, researchers, students and various functional departments for information and communication technology systems, a data center has been constructed meeting tier III specifications, which is fully functional and is situated at the city campus.

IBA also provides residential facilities for full-time IBA students. The boys' hostel comprises of an old block having accommodation of about 125 students and the new hostel block A, having a total capacity of about 150 students, while block B with the capacity of additional 120 students has been established recently whereas block C is under construction which will provide an additional accommodation of 102 students. Besides this, a block comprising of 96 beds hostel is located in the IBA staff town area for female students. The facilities include dining, indoor and outdoor games, TV lounges equipped with a large LCD screen, satellite decoder, car parking, and high-speed internet service. The construction of new hostel buildings for both male and female students has greatly improved the living conditions for the hostel residents.

IBA also provides campus residence facilities for faculty and other non-teaching staff. There are 24 residences of different sizes and 10 servant quarters, as well as a block to provide accommodation to visiting faculty members.

With the objective to make the campuses environment friendly and combat climate change, the IBA Karachi has taken a number of initiatives. In this regard, IBA has installed an air quality monitoring device at Adamjee Academic Centre to measure the air quality in the building. The Institute has taken positive initiatives for clean energy with less dependency on fossil fuel. With a strategy to plant around 3500 trees in record time, the Institute is playing its part in giving back to the environment. Two auto chlorination plants have been installed in both the campuses to provide clean water to users daily. The Institute is actively moving forward in terms of development as it is installing 23000 LEDs in both campuses to reduce energy consumption. The next step is to install solar panels to provide clean energy and cut utility bills up to 25%.

4. Area Study Centre for Europe, University of Karachi

The Area Study Centre for Europe, University of Karachi was established along with five other Area Study Centres (situated in major state sector Universities of Pakistan) by an act of parliament (ASC Ac No XLV,1975) in 1975. The Centre is an autonomous institution, under the academic discipline of the University of Karachi, supervised by a Board of Governors. It is funded by the Federal Government.

The Centre is slightly isolated from the hustle and bustle of mainstream University departments. The centre provides a peaceful atmosphere for teaching and research at the M.Phil./PhD level. Its M.Phil. course work programme in European studies spread over two semesters is designed to give students a thorough understanding of contemporary Europe. Besides traditional subjects like European history, philosophy and thoughts, the courses are now focused on the European Union, its politics, law, economics, external relationships and common foreign and security policy. Europe's relation with Pakistan, the Muslim world and the developing world are given particular importance.

The research findings of the Centre's research staff are published in the form of books, monographs and profiles. The centre also publishes the bi-annual Journal of European Studies, which covers articles on contemporary European issues.

The Centre also offers courses in English, French and German languages at the certificate level and diploma in the English and French language.

5. Pakistan Journal of International Affairs (PJIA)

Pakistan Journal of International Affairs (PJIA) is peer-reviewed journal that publishes original contributions in the field of International Relations. Articles reporting empirical studies and theoretical analyses from a range of perspectives and all aspects of international affairs are welcome. The journal particularly welcomes papers that focus to sensitize and provide direction for policy and practice that arise from theoretical and empirical work. PJIA welcome articles that aim to identify news areas for research and develop critique and reflection in world politics, states affairs, international laws, Islamic laws, global social and ethical behaviour and global economics issues.

The Journal is presently recognized by the Higher Education Commission (HEC) of Pakistan in "Y" Category.
